Reforming Intelligence

Thomas C. Bruneau, Steven C. Boraz, 2009-04-20 These days it's rare to pick up a newspaper and not see a story related to intelligence From the investigations of the 9/11 commission to accusations of illegal wiretapping to debates on whether it's acceptable to torture prisoners for information intelligence both accurate and not is driving domestic and foreign policy And yet in part because of its inherently secretive nature intelligence has received very little scholarly study Into this void comes **Reforming Intelligence** a timely collection of case studies written by intelligence experts and sponsored by the Center for Civil Military Relations CCMR at the Naval Postgraduate School that collectively outline the best practices for intelligence services in the United States and other democratic states **Reforming Intelligence** suggests that intelligence is best conceptualized as a subfield of civil military relations and is best compared through institutions The authors examine intelligence practices in the United States United Kingdom and France as well as such developing democracies as Brazil Taiwan Argentina and Russia While there is much more data related to established democracies there are lessons to be learned from states that have created or re-created intelligence institutions in the contemporary political climate In the end reading about the successes of Brazil and Taiwan the failures of Argentina and Russia and the ongoing reforms in the United States yields a handful of hard truths In the murky world of intelligence that's an unqualified achievement
