Climate Justice T. Thorp, 2014-08-28 In this ground breaking work Teresa Thorp tackles the causes and effects of climate injustice by methodically mapping out an approach by which to reach a negotiated consensus with legal force to protect present and future generations Using the law and policy of climate change as a vehicle for illustrating how to shape our future she comprehensively overturns the widely held contemporary view of climate justice as inconstant charitable acts relative systemic notions and static concepts isolated from the common good and a congruent rule of law Responding to the adverse impacts of climate change heat waves extended drought severe flooding and desertification which represent an urgent and potentially irreversible threat to human societies and the planet requires a new and cohesive way of thinking about global policy and the law The mission of guaranteeing and realising human dignity human security and human rights is multi fold Looking through the lens of kaleidoscopic normativity a nextensible language anchored in common juridical elements should facilitate how norms enter the socio legal frame and interact within it Users need to be able to display and interpret the congruent legal norm in order to obey and apply it Galvanising this process by constitutionalising first principles and consequential norms is vital for attaining fraternity between nations and among all people *Climate Justice A Voice for the Future* is an essential read for scholars practitioners and all those genuinely interested in reaching consensus on a post 2015 global climate accord a unified development agenda and a cohesive pact for disaster risk reduction
