

# Watershed Management: A Community Process

## PHASES OF WATERSHED MANAGEMENT

### PHASE 1: Assessment

- 1 Tell your neighbors to share their values and discuss common goals and objectives.
- 2 Meet with professionals and volunteers to identify all natural resources in the watershed.
- 3 Focus on areas that have been threatened or degraded. But avoid, increased water flow and your habitat are indicators of changing conditions.
- 4 Include high quality areas in your inventory. The resources of your community can help you establish your overall goals.
- 5 Use your assessment information to establish a baseline for the condition of the resources. Community discussions help reveal public values and integrate different values, resources and interests.

### PHASE 2: Planning

- 6 Get local businesses to help in the process. Industry is the other an important source of input, opinion and resource solutions.
- 7 Motivate professionals, change attitudes in your watershed team. Their ideas can help determine the quality of life for them and their children.
- 8 Set goals and objectives for the watershed management plan. Early the community's most important task. Include priorities.
- 9 Establish clear measures of success so you will know when you've met your management goals and objectives.
- 10 Show you and your community. It's time to get everything down on paper. In developing a written Watershed Management plan for the entire watershed.

### PHASE 3: Implementation and Evaluation

- 11 Coordinate extensive cooperation efforts as needed to take watershed efforts should change for implementation with watershed management.
- 12 Establish standards and replace goals and objectives to provide feedback for fish, watershed and other values.

- 13 Working and how people feel about the watershed is one way to measure success. Do they love it better? Then do they contribute? Will their support increase?
- 14 Successful watershed management projects focus on natural resources, water conservation, education, fishing, recreation and ecological integrity.

- 15 Methods enhancement helps protect water quality and low other environmental resources and avoid hazards.
- 16 Study the more previously planned can be implemented to protect natural resources and provide feedback.

- 11 Develop local ordinances to protect the resources in your watershed. Public awareness programs help ensure their enforcement.
- 12 Encourage developers to construct new buildings to phase. Preserving the integrity of natural resources is the most environmentally sound and cost effective approach to watershed management.
- 13 Use conservation opportunities on agricultural lands to enhance habitat and create open space.
- 14 When you do the more, new challenges for water supply, including providing, new problems, and competing need water resources not productivity. Other resources may require proper support.
