Competition Policy Analysis An Integrated Approach Zew Economic Studies:

Competition Policy Analysis Kai Hüschelrath, 2008-09-08 Competition policy is an integral and prominent part of economic policy making in the European Union The EU Treaty prescribes its member states to conduct economic policy in accordance with the principle of an open market economy with free competition More precisely the goal of EU competition policy is to defend and develop effective competition in the common market European Commission 2000 7 Under its Commissioners van Miert Monti and most cently Kroes the EU Commission has stepped up its effort to pursue and achieve the aforementioned goal A number of so called hard core cartels such as the torious vitamin cartel led by Roche have been detected tried in violation of Art 81 of the Maastricht Accord and punished with severe fines Also Microsoft was hit hard by the strong hand of the Commission having been severely fined for ploiting a dominant market position Economic analysis has been playing an increasingly significant role in the Commission s examination of competition law cases This holds true in particular for merger control Here however the Commission has had to accept some poi ant defeats in court such as the Court s reversals of Airtours First Choice or GE Honeywell Among other things the European Court of Justice found the e nomic analysis as conducted by the EU s Directorate General for Competition to be flawed and the conclusions drawn not to be convincing These rejections by the courts have stirred up the scholarly debate on the conceptual foundations of Eu pean competition policy

The Impact of Cartels on National Economy and Competitiveness Jurgita Bruneckienė, Irena Pekarskienė, Andrius Guzavičius, Oksana Palekienė, Jūratė Šovienė, 2015-06-09 The book presents theoretical and empirical research on the integrated assessment of cartels effects on national economies The empirical analysis is based on three cases in Lithuania a country chosen because it corresponds to the features of a small economy with a developing culture of competition An integrated assessment of a cartel s impact by measuring the net economic effect created by its operations on the market is extremely important at the scale of national economies If a cartel s true impact is not identified and evaluated it is impossible to make important strategic decisions for the whole economy instead of individual affected parties and to establish an optimum baseline for mitigating the harm done to the economy Thus an integrated cartel impact assessment can help to more proactively combat cartel agreements on the market and improve the economic welfare of the respective country

Public Procurement and the EU Competition Rules

Albert Sánchez Graells, 2015-06-25 Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market Hitherto their close connection has been noted but not closely examined This work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market This process of convergence between competition and public procurement law is particularly apparent in the 2014 Directives on public procurement which consolidate the principle of competition in terms very close to those advanced by the author in the first edition This second edition builds upon this approach and continues to ask how competition law principles inform and condition public procurement rules and whether the latter in their revised form are adequate to ensure that competition is not distorted The second edition also deepens the analysis of the market behaviour of the public buyer from a competition perspective Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of these rules against a standard of the proper functioning of undistorted competition in the market for public procurement It also traces the increasing relevance of competition considerations in the case law of the Court of Justice of the European Union and sets out criteria and recommendations to continue influencing the development of EU Economic Law
