Competition For Technological Leadership Eu Policy For High Technology:

Competition for Technological Leadership Johan Lembke, 2002-11-27 This study of EU political intervention in support of advanced technology will be a fascinating read for advanced students and academic researchers of international political economy international affairs and political science Competition for Technological Leadership will also appeal to journalists policymakers and analysts with a special interest in EU high technology policy **BOOK JACKET** **Governing**

European Communications Maria Michalis, 2007-01-01 Governing European Communications provides a comprehensive and up to date account of the emergence dynamics and evolution of European level communications governance in the post war era focusing on telecommunications and television policies and regulation and their technological convergence Concentrating on the EU the book embeds governance within broader economic and political developments in a global context and demonstrates that European governance has been more about the character rather than the level of regulation

European Union Research Policy Veera Mitzner, 2020-06-01 This book describes the emergence of research policy as a key competence of the European Union EU It shows how the European Community EC the predecessor of the EU which initially had very limited legal competence in the field progressively developed a solid policy framework presenting science and research as indispensable tools for European economic competitiveness and growth In the late 20th century Western Europe hungry for growth concerned about the American technological lead and keen to compete in the increasingly open international markets the argument for a joint European effort in science and technology seemed plausible However the EC was building its new functions in an already crowded field of European research collaboration and in a shifting political context marked by austerity national rivalries new societal and environmental challenges and emerging ambivalence about science This book conveys the contested history of one of the EU s most successful policies It is a story of struggle and frustration but also of a great institutional and intellectual continuity The ideational edifice for the EC EU research policy that was put in place during the 1960s and 1970s years proved remarkably robust Its durability enabled the rapid takeoff of the European Commission s initiatives in the more favorable political atmosphere of the early 1980s and the subsequent expansion of the EU research funding instruments and programs that permanently transformed the European research landscape

Research, Quality, Competitiveness Attilio Stajano, 2008-09-22 The European Union EU was launched as a response to the economic dominance of the United States and to a lesser degree the Soviet Union The nations of Western Europe were too small to compete against large scale and diversified economies on their own Six countries eventually expanding to 27 and counting took a series of steps toward progressively deeper integration the removal of internal tariffs the construction of a common external tariff the elimination of many but not all non tariff barriers leading to a single market and the adoption of a common currency by 15 of the member states The EU today equals and even exceeds the US on many key indicators of performance In the process two similar but nonetheless divergent models of social and economic life stand in

contrast with each other The U S is more committed to capitalism and does little to dilute its harsh edges while the nations of Europe support wider social safety nets and more active regulation of commercial activity to mute the crueller aspects of the free market Until recently the economic dynamism of the U S called into question whether the so called European social model was sustainable in an era of globalization The EU was slipping in competitiveness and was being challenged by new global power houses like China and India Although the U S economy has slowed there is little indication that European countries are capable of leveraging the situation to their advantage

21st Century Innovation Systems for Japan and the United States National Research Council,Policy and Global Affairs,Board on Science, Technology, and Economic Policy,Committee on Comparative Innovation Policy: Best Practice for the 21st Century,2009-05-15 Recognizing that a capacity to innovate and commercialize new high technology products is increasingly a key for the economic growth in the environment of tighter environmental and resource constraints governments around the world have taken active steps to strengthen their national innovation systems These steps underscore the belief of these governments that the rising costs and risks associated with new potentially high payoff technologies their spillover or externality generating effects and the growing global competition require national R D programs to support the innovations by new and existing high technology firms within their borders The National Research Council's Board on Science Technology and Economic Policy STEP has embarked on a study of selected foreign innovation programs in comparison with major U S programs The 21st Century Innovation Systems for the United States and Japan Lessons from a Decade of Change symposium reviewed government programs and initiatives to support the development of small and medium sized enterprises government university industry collaboration and consortia and the impact of the intellectual property regime on innovation This book brings together the papers presented at the conference and provides a historical context of the issues discussed at the symposium

India's Changing Innovation System National Research Council,Policy and Global Affairs,Board on Science, Technology, and Economic Policy,Committee on Comparative Innovation Policy: Best Practice for the 21st Century,2007-07-27 As part of its review of Comparative National Innovation Policies Best Practice for the 21st Century the Board on Science Technology and Economic Policy convened a major symposium in Washington to examine the policy changes that have contributed to India's enhanced innovative capacity This major event organized in cooperation with the Confederation of Indian Industry was particularly timely given President Bush's March 2006 visit to India and the Joint Statement issued with the Indian government calling for strategic cooperation in innovation and the development of advanced technologies The conference which brought together leading figures from the public and private sectors from both India and the United States identified accomplishments and existing challenges in the Indian innovation system and reviewed synergies and opportunities for enhanced cooperation between the Indian and U S innovation systems This report on the conference contains three elements a summary of the key symposium presentations an introductory chapter analyzing the policy issues raised at the symposium

and a research paper providing a detailed examination of India's knowledge economy placing it in terms of overall global trends and analyzing its challenges and opportunities

Media Convergence Handbook - Vol. 1 Artur Lugmayr, Cinzia Dal Zotto, 2015-11-20 The Media Convergence Handbook sheds new light on the complexity of media convergence and the related business challenges Approaching the topic from a managerial technological as well as end consumer perspective it acts as a reference book and educational resource in the field Media convergence at business level may imply transforming business models and using multiplatform content production and distribution tools However it is shown that the implementation of convergence strategies can only succeed when expectations and aspirations of every actor involved are taken into account Media consumers content producers and managers face different challenges in the process of media convergence Volume I of the Media Convergence Handbook encourages an active discourse on media convergence by introducing the concept through general perspective articles and addressing the real world challenges of conversion in the publishing broadcasting and social media sectors

Creating a Transatlantic Marketplace Michelle P. Egan, 2005-07-22 Looking at the current state of the EU US trade relationship this text studies attempts at economic integration and cooperation arguing that it can provide information about the evolution of new policies and practices to manage the transatlantic economy

Innovative Flanders National Research Council, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, Committee on Comparative Innovation Policy: Best Practice for the 21st Century, 2008-10-16 Recognizing that innovation is the key to international competitiveness in the 21st century policymakers around the world are seeking more effective ways to translate scientific and technological knowledge into new products processes and businesses They have initiated major programs often with substantial funding that are designed to attract nurture and support innovation and high technology industries within their national economies To help U S policymakers become more aware of these developments a committee of the National Academies Board on Science Technology and Economic Policy undertook a review of the goals concept structure operation funding levels and evaluation efforts of significant innovation programs around the world As a part of this effort the committee identified Flanders a region of Belgium with substantial autonomy which is recognized for its comprehensive approach to innovation Based on initial meetings in Washington and Brussels and with the endorsement of Flanders Vice Minister President Fientje Moerman it was agreed to organize a conference that would review regional innovation policies in the context of the policies and programs of the Flanders government and their interaction with those of the European Union This book provides a summary of that symposium

Intermediality and Media Change Juha Herkman, 2012 Abstract This book is about intermediality as an approach to analysing and understanding media change Intermediality and Media Change is critical of technological determinism that characterises new media discourse about the ongoing digitalization framed as a revolution and creating sharp contrasts between old and new media Intermediality instead emphasises paying attention to continuities between

media of all types and privileges a comparative perspective on technological changes in media over time and space The concept of intermediality refers to interaction and interrelationships between media This focus is important in two ways It strengthens the mutual construction and articulation of media forms as a vital element of the research agenda In contrast to the emphasis on convergence it also permits the consideration of the parallel construction and articulation of specific features and identities that characterise a medium as well as the emergence of new divergences Intermediality and Media Change studies intermediality from both theoretical and empirical perspectives The book starts by positioning intermediality as a theory and a methodological approach The first group of articles focuses on critical reflection of media and mediation as concepts The second group deals with intermediality in discourses about media change The third group concentrates on analysis of representative cases and the fourth group focuses on media institutions and professions
