

Installation and Start-Up Instructions

SAFETY CONSIDERATIONS

Installing and servicing air conditioning equipment can be hazardous due to system pressure and electrical components. Only trained and qualified service personnel should install or service air conditioning equipment.

Untrained personnel can perform basic maintenance, such as cleaning and replacing filters. All other operations should be performed by trained service personnel. When working on air conditioning equipment, observe precautions in literature and on tags and labels attached to unit.

Follow all safety codes. Wear safety glasses and work gloves. Use quenching cloth for brazing operations. Have fire extinguisher available. Read these instructions thoroughly. Consult local building codes and National Electrical Code (NEC) for special installation requirements.

⚠ WARNING

Before installing or servicing system, always turn off main power to system. There may be more than one disconnect switch. Turn off accessory heater power if applicable. Electrical shock can cause personal injury.

Certified dimension drawings available upon request

Fig. 1 — Dimensions, Connections and Mounting Pad (Refer to Table 1)

Step 1 — Check Equipment and Jobsite — Install on a solid, level mounting pad. It is not recommended that unit be attached to pad using tiedown bolts. Fasten unit to pad using holes provided in unit mounting feet. See Fig. 1.

When installing, allow sufficient space for airflow clearance, wiring, refrigerant piping and service. Maintain a minimum of 4 ft clearance from obstructions above and 18 in. on 3 sides of unit (12 in. on fourth side). Maintain a distance of 24 in. between condensing units. Position so water or ice from roof or eaves cannot fall directly on unit.

Step 2 — Replace Indoor AccuRater™ Piston, if required.

REPLACE ACCURATER REFRIGERANT CONTROL PISTON in the indoor coil, if required, before connecting refrigerant lines. Refer to Table 2 for proper piston size.

Step 3 — Make Piping Connections — Outdoor units may be connected to indoor sections using Carrier accessory tubing package (refer to Service Data) or field-supplied tubing of refrigerant grade, correct size (see Table 1) and condition. For tubing requirements beyond 50 ft, obtain information from your local distributor.

Outdoor Units Connected to Carrier-Approved Indoor Units — Outdoor units contain correct system refrigerant charge for operation with indoor unit of the same size when connected by 25 ft of field-supplied or Carrier accessory tubing. Check refrigerant charge for maximum efficiency (see Refrigerant Charging, page 4 and Service Data).
