Cartography Exhaustion Nihilism Inside Univocal:

Cartography of Exhaustion Peter Pál Pelbart, 2016-03-01 In our current landscape of communicative and connective excess a very novel contemporary exhaustion exacerbated by our relation to the postdigital terrain is ever present The Brazilian philosopher and schizoanalyst Peter P l Pelbart pushes the vital question of our nihilistic age to the limits how can one learn to be left alone live alone and perhaps by way of a Deleuzian absolute solitude conjure a vitality for living again and indeed finding something truly worthy of saying Through various poetic meanderings and meditations and building on the works of Blanchot Musil Guattari and Delingy among others Pelbart reestablishes the possibility of fighting off the exhaustion of our current state of affairs For Pelbart we must chart the cartography of exhaustion as if it were a sort of molecular symptomology

Pedagogy at the End of the World Jessie L. Beier, 2023-11-22 This book interrogates the ways in which end of the world thinking has come to define and delimit pedagogical approaches in Anthropocene times Chapters unfold through a series of speculative studies of educational futurity sustainable futures energy futures working futures each of which is positioned as an experimental site for probing the limits of pedagogical unthinkability so as to speculate through concept creation on unthought educational trajectories Specifically the book is oriented towards the creation of pedagogical concepts that work to problematize and resituate questions of educational futurity in relation to the planetary realities raised by today's pressing extinction events It is from this experimentation that a weird pedagogy emerges that is an experimental pedagogical anti model a speculative program for the unprogrammable that seeks to counter actualize potentials of and for unthinking pedagogy at the so called end of the world

Schizoanalysis and Asia Joff P. N. Bradley, 2022-11-08 This book is an update extension and radicalization of Guattari's philosophy of the postmedia It is the first of its kind to comprehensively apply Guattari's thought on postmedia to post millennium technological developments Given the considerable interest in Félix Guattari and Gilles Deleuze's work and its influence in Asia and South East Asia and beyond the book is a timely contribution and update of Guattari's essential concepts It offers a fresh approach to applying Guattari and Deleuze to local contexts Both Félix Guattari's schizoanalysis and Gilles Deleuze's philosophy remain excellent tools to decode the politics of postmedia The book centres around the influence of Guattari's work on the Japanese archipelago and how Japan itself impacted on the work of Guattari in the 1980s The book updates Guattari's work and apply it to the problems which are affecting societies in Asia and beyond It highlights current research on postmedia by scholars who are working to understand how Japanese society is functioning post Fukushima and how the country continues to toil from the geo trauma of the real

From Shared Life to Co-Resistance in Historic Palestine Marcelo Svirsky, Ronnen Ben-Arie, 2017-11-07 How do we contribute to the decolonisation of Palestine In what ways can we divest from settler arrangements in the present day Exploring the Zionist takeover of Palestine as a settler colonial case this book argues that in studying the elimination of native life in Palestine the loss of Arab Jewish shared life cannot be ignored Muslims Christians and Jews shared a life in

Ottoman Palestine and in a different way during British rule The attempt to eliminate native life involved the destruction of Arab society its cultural hegemony and demographic superiority but also the racial rejection of Arab Jewish sociabilities of shared life Thus the settlerist process of dispossession of the Arabs was complemented with the destruction of the social and cultural infrastructure that made Arab Jewish life a historical reality Both operations formed Israeli polity Can this understanding contribute to present day Palestinian resistance and a politics of decolonisation In this book the authors address this question by exploring how the study of elimination of shared life can inform Arab Jewish co resistance as a way of defying Israel s Zionist regime Above and beyond opposing an unacceptable state of affairs this book engages with past and present to discuss possible futures

Mapping and Politics in the Digital Age Pol Barga es-Pedreny, David Chandler, Elena Simon, 2018-11-06 Throughout history maps have been a powerful tool in the constitutive imaginary of governments seeking to define or contest the limits of their political reach Today new digital technologies have become central to mapping as a way of formulating alternative political visions Mapping can also help marginalised communities to construct speculative designs using participatory practices Mapping and Politics in the Digital Age explores how the development of new digital technologies and mapping practices are transforming global politics power and cooperation The book brings together authors from across political and social theory geography media studies and anthropology to explore mapping and politics across three sections Contestations introduces the reader to contemporary developments within mapping and explores the politics of mapping as a form of knowledge and contestation Governance analyses mapping as a set of institutional practices providing key methodological frames for understanding global governance in the realms of urban politics refugee control health crises and humanitarian interventions and new techniques of biometric regulation and autonomic computation Imaginaries provides examples of future oriented analytical frameworks highlighting the transformation of mapping in an age of digital technologies of control and regulation In a world conceived as without borders and fixed relations new forms of mapping stress the need to rethink assumptions of power and knowledge This book provides a sophisticated and nuanced analysis of the role of mapping in contemporary global governance and will be of interest to students and researchers working within politics geography sociology media and digital culture and technology The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY ND 4 0 license

Educational Ills and the (Im)possibility of Utopia Joff Bradley, 2020-05-21 As a bold provocation to reimagine what the philosophy of education might mean in the 21st century this book responds to the exhaustion of present theoretical models and indeed the degradation of fabulative thought in its current prospectus The contributors from Asia the Americas and Europe proffer a frank response to the everyday reality of the classroom where teachers compete with electronic devices for the attention of students whose minds are literally elsewhere cocooned in the noospheric ether Outside of lecture halls the world is suffering the rise of fascism panic and anger driven by

precarious employment and a looming fatalism and resignation in the face of ecological calamity These developments have led to an avalanche of psychical woes afflicting young people ranging from trauma the loss of hope and in extremis violence and suicide The concerned and committed writers of this volume therefore raise the timely question of the return of utopia as a fitting desperate and indeed necessary response to the ecological existential and pedagogical crises spreading across the planet At this most crucial juncture in human history the excellent contributions to this book offer singularly unique perspectives regarding the possibility impossibility of utopia This book was originally published as a special issue of the journal *Educational Philosophy and Theory*

Spinoza's Philosophy of Ratio Beth Lord, 2018-03-08 These essays explore the surprisingly varied dimensions of ratio an unacknowledged keystone of Spinoza's thought They take you from Spinoza's geometrical diagrams to his concepts of mind body the emotions and the cosmos

Dionysus and Apollo after Nihilism Carlos A. Segovia, Sofya Shaikut Segovia, 2023-02-17 This book recovers Dionysus and Apollo as the twin conceptual personae of life's dual rhythm in an attempt to redesign contemporary theory through the reciprocal affirmation of event and form earth and world dance and philosophy It revisits Heidegger and Lévi Strauss and combines them with Roy Wagner with the purpose of moving beyond Nietzsche's manifold legacy including post structuralism new materialism and speculative realism It asks whether merging philosophy and anthropology around issues of comparative ontologies may give us a chance to re become earthbound dwellers on a re worlded earth

Creative Ecologies Hélène Frichot, 2018-12-13 Architect and philosopher Hélène Frichot examines how the discipline of architecture is theorized and practiced at the periphery Eschewing a conventionally direct approach to architectural objects to iconic buildings and big name architects she instead explores the background of architectural practice to introduce the creative ecologies in which architecture exists only in relation to other objects and ideas Consisting of a series of philosophical encounters with architectural practice that are neither neatly located in one domain nor the other this book is concerned with other ways of doing architecture It examines architecture at the limits where it is muddled by alternative disciplinary influences whether art practice philosophy or literature Frichot meets a range of creative characters who work at the peripheries and who challenge the central assumptions of the discipline showing that there is no core of architecture there is rather architecture as a multiplicity of diverse concerns in engagement with local environments and worlds From an author well known in the disciplines of architecture and philosophy for her scholarship on Deleuze this is a radical accessible and highly original approach to design research deftly engaging with an array of current topics from the Anthropocene to affect theory new materialism to contemporary feminism

Inhabited Phillip Vannini, April Vannini, 2021-11-15 People are key elements of wild places At the same time human entanglements with wild ecologies involve extractivism the growth of resource based economies and imperial colonial expansion activities that are wreaking havoc on our planet Through an ethnographic exploration of Canada's ten UNESCO Natural World Heritage sites *Inhabited* reflects on the meanings of wildness wilderness and natural heritage As we are introduced to local

inhabitants and their perspectives Phillip Vannini and April Vannini ask us to reflect on the colonial and dualist assumptions behind the received meaning of wild challenging us to reimagine wildness as relational and rooted in vitality Over the three years they spent in and around these sites they learned from Indigenous and non Indigenous peoples about their entanglements with each other and with non human animals rocks plants trees sky water and spirits The stories actions and experiences they encountered challenge conventional narratives of wild places as uninhabited by people and disconnected from culture and society While it might be tempting to dismiss the idea of wildness as outdated in the Anthropocene era Inhabited suggests that rethinking wildness offers a better if messier way forward Part geography and anthropology part environmental and cultural studies and part politics and ecology Inhabited balances a genuine love of nature's vitality with a culturally responsible understanding of its interconnectedness with more than human ways of life
