European Symposium on Computer Aided Process Engineering - 11 R. Gani, S.B. Jørgensen, 2001-04-30 This book contains papers presented at the 11th Symposium of Computer Aided Process Engineering ESCAPE 11 held in Kolding Denmark from May 27-30 2001. The objective of ESCAPE 11 is to highlight the use of computers and information technology tools that is the traditional CAPE topics as well as the new CAPE topics of current and future interests. The main theme for ESCAPE 11 is process and tools integration with emphasis on hybrid processing, cleaner and efficient technologies, process integration, computer aided systems for modelling, design, synthesis, control, tools integration and industrial case studies, application of integrated strategies. The papers are arranged in terms of the following themes: computer aided control, operations, computer aided manufacturing, process and tools integration and new frontiers in CAPE. A total of 188 papers consisting of 5 keynote and 183 contributed papers are included in this book.

European Symposium on Computer Aided Process Engineering - 10 Sauro Pierucci, 2000-05-10 This book includes papers presented at ESCAPE 10 the 10th European Symposium on Computer Aided Process Engineering held in Florence Italy 7-10th May 2000. The scientific program reflected two complementary strategic objectives of the Computer Aided Process Engineering CAPE Working Party: one checked the status of historically consolidated topics by means of their industrial application and their emerging issues while the other was addressed to opening new windows to the CAPE audience by inviting adjacent Working Parties to co-operate in the creation of the technical program. The former CAPE strategic objective was covered by the topics Numerical Methods, Process Design and Synthesis, Dynamics Control, Process Modeling, Simulation and Optimization. The latter CAPE strategic objective derived from the European Federation of Chemical Engineering EFCE promotion of scientific activities which autonomously and transversely work across the Working Parties' terms of references. These activities enhance the exchange of the know-how and knowledge acquired by different Working Parties in homologous fields. They also aim to discover complementary facets useful to the dissemination of tools and of novel procedures. As a consequence the Working Parties Environmental Protection, Loss Prevention and Safety Promotion and Multiphase Fluid Flow were invited to assist in the organization of sessions in the area of A Process Integrated Approach for Environmental Benefit, Loss Prevention and Safety, Computational Fluid Dynamics. A total of 473 abstracts from all over the world were evaluated by the International Scientific Committee. Out of them 197 have been finally selected for the presentation and reported into this book. Their authors come from thirty different countries. The selection of the papers was carried out by twenty-eight international reviewers. These proceedings will be a major reference document to the scientific and industrial community and will contribute to the progress in Computer Aided Process Engineering.
