Thinking in Clinical Practice Eileen Gambrill, 2012-05-01 Praise for *Critical Thinking in Clinical Practice* Third Edition Eileen Gambrill is unparalleled in her ability to describe common flaws and biases in clinical decision making The result in this revised edition is a steadfast call for change that also acknowledges the demands of practice A must read for clinicians and researchers alike Elizabeth K Anthony PhD Assistant Professor School of Social Work Arizona State University This Third

Edition builds upon the impressive strengths of Gambrill's prior treatments of the topic to support the notion that critical thinking is a teachable skill and one essential for contemporary practice in the human services. This book should be the default authority on the topic of critical thinking for human service professionals and would be an excellent textbook. Bruce A. Thyer, PhD, LCSW, Professor and former Dean, Florida State University College of Social Work. I was skeptical about how *Critical Thinking in Clinical Practice* could be improved, but Eileen Gambrill has succeeded. Her articulation of critical thinking skills for clinical decisions ultimately will benefit the people we serve. Joanne Yaffe, PhD, ACSW, Associate Professor of Social Work and Adjunct Associate Professor of Psychiatry, University of Utah. A balanced and illustrative guide to incorporating critical thinking values, knowledge, and skills into clinical education and practice. Now in a third edition, *Critical Thinking in Clinical Practice* is written for helping professionals who want to think more clearly about the decisions they make and the context in which they make them. It is a practical volume for clinicians who would like to expand their knowledge of common pitfalls and fallacies in clinical reasoning. As in earlier editions, this Third Edition draws on research related to problem solving and decision making, illustrating the relevance of research findings to everyday clinical practice and policy. Revised throughout, the new edition includes discussion of the influence of pharmaceutical companies on the helping professions, including disease mongering, the creation of bogus risks, problems, and needless worries. Different kinds of propaganda in the helping professions that compromise informed consent. Additional coverage of classification pathology, reliance on authority, and hazards in data collection. The development of decision aids of value to both professionals and clients. The relative contribution of specific interventions compared to nonspecific factors to positive outcome. Factors related to decision making in multidisciplinary teams. New developments regarding intuitive and analytic reasoning. The pragmatic theory of fallacies. Designed to enhance the quality of services offered to clients. *Critical Thinking in Clinical Practice*, Third Edition, is filled with insightful examples, useful lists, websites, and guidelines, presenting an essential resource for all helping professionals and students in the helping professions.
