Ward-based Critical Care: a guide for health professionals Ann M Price, Dr Sally A Smith, Dr Alistair Challiner, 2016-01-01

Like the original Ward based Critical Care this second edition aims to guide practitioners in the initial management of critically ill adult patients within the ward setting It should be of value to a wide range of healthcare professionals including junior doctors nurses physiotherapists and students It will also be relevant to practitioners who are moving into any setting that cares for acutely ill patients This volume has been slightly reorganised since the first edition to ensure that practical aspects are incorporated within the relevant sections The book is still structured around the ABCDE approach to assessing and managing patients as this is promoted in critical care and resuscitation care training The focus on practical examples and hot tips to aid memory of key points continues All the chapters have been updated with the most recent guidance as available at the time of writing This has meant that some chapters have required major revisions while others have remained relatively unchanged Some new chapters have been included such as the ones on anaphylactic shock patient safety dealing with pregnant women in the ward setting and massive blood transfusion In addition each section now starts with a chapter giving an overview of the A E approach in order to provide more detail about assessing and managing those aspects of patient care This informative book contains many useful features such as clinical scenarios hot tips and practical skills and the text is richly illustrated and cross referenced throughout

Decision Making in Emergency Critical Care John E.

Arbo, Stephen J. Ruoss, Geoffrey K. Lighthall, Michael P. Jones, 2014-08-25 Looking for a brief but authoritative resource to help you manage the types of complex cardiac pulmonary and neurological emergencies you encounter as a resident or attending emergency room physician Look no further than **Decision Making in Emergency Critical Care An Evidence Based Handbook** This portable guide to rational clinical decision making in the challenging and changing world of emergency critical care provides in every chapter a streamlined review of a common problem in critical care medicine along with evidence based guidelines and summary tables of landmark literature Features Prepare for effective critical care practice in the emergency room s often chaotic and resource limited environment with expert guidance from fellows and attending physicians in the fields of emergency medicine pulmonary and critical care medicine cardiology gastroenterology and neurocritical care Master critical care fundamentals as experts guide you through the initial resuscitation and the continued management of critical care patients during their first 24 hours of intensive care Confidently make sustained data driven decisions for the critically ill patient using expert information on everything from hemodynamic monitoring and critical care ultrasonography to sepsis and septic shock to the ED ICU transfer of care **Evaluating Critical Care** William J. Sibbald, Julian F. Bion, 2002-01-21 Measuring the quality of a complex service like critical care that combines the highest technology with the most intimate caring is a challenge Recently consumers clinicians and payers have requested more formal assessments and comparisons of the quality and costs of medical care 2 Donabedian 1 proposed a framework for thinking about the quality of medical care that separates quality into three components structure process and outcome An instructive analogy for understanding this framework is to imagine a food critic evaluating the quality of a restaurant The critic might comment on the decoration and lighting of the restaurant how close the tables are to each other the extent of the wine list and where the chef trained These are all evaluations of the restaurant structure In addition the critic might comment on whether the service was courteous and timely measures of process Finally the critic might comment on outcomes like customer satisfaction or food poisoning Similarly to a health care critic structure is the physical and human resources used to deliver medical care Processes are the actual treatments offered to patients Finally outcomes are what happens to patients for example mortality quality of life and satisfaction with care Table 1 There is a debate about which of these measurements is the most important measure of quality **ACCCN's Critical Care Nursing** Leanne Aitken, Andrea Marshall, Wendy Chaboyer, 2016-01-04 With each edition ACCCN s Critical Care Nursing has built on its highly respected reputation Its contributors aim to encourage and challenge practising critical care nurses and students to develop world class critical care nursing skills in order to ensure delivery of the highest quality care Endorsed by the Australian College of Critical Care Nurses ACCCN this 3rd edition presents the expertise of foremost critical care leaders and features the most recent evidence based research and up to date advances in clinical practice technology procedures and standards Expanded to reflect the universal core elements of critical care nursing practice authors Aitken Marshall and Chaboyer have retained

the specific information that captures the unique elements of contemporary critical care nursing in Australia New Zealand and other similar practice environments Structured in three sections ACCCN s Critical Care Nursing 3rd Edition addresses all aspects of critical care nursing including patient care and organisational issues while highlighting some of the unique and complex aspects of specialty critical care nursing practice such as paediatric considerations trauma management and organ donation Presented in three sections Scope of Critical Care Principles and Practice of Critical Care Speciality Practice Focus on concepts that underpin practice essential physical psychological social and cultural care New case studies elaborate on relevant care topics Research vignettes explore a range of topics Practice tips highlight areas of care particularly relevant to daily clinical practice Learning activities support knowledge reflective learning and understanding Additional case studies with answers available on evolve NEW chapter on Postanaesthesia recovery Revised coverage of metabolic and nutritional considerations for the critically ill patient Aligned with the NEW ACCCN Standards for Practice
