The Political Economy of the Common Agricultural Policy Fernando Collantes, 2020-03-19 What is the balance of the European Union's Common Agricultural Policy more than half a century after its birth Does it illustrate the virtues of the European model of coordinated capitalism as opposed to US style liberal capitalism Or is it an incoherent set of instruments that exert diverse negative impacts and like Frankenstein's monster seems to have escaped the control of its designers The Political Economy of the Common Agricultural Policy does not criticize the CAP from the liberal standpoint that views most public interventions in the economy as bad for efficiency and welfare The CAP has been costly to Europeans both as consumers and as taxpayers and has also generated a number of negative impacts upon third countries but these costs and impacts have been more moderate than is suggested This book proposes that the issue with the CAP is not a generic problem of coordinating capitalism but instead a more specific problem of low quality coordination The text argues that profound reform of the European Union's institutions and policies is required to counter the rapid rise of a more Eurosceptical state of mind but in the case of agricultural policy history casts serious doubts on the capacity of the European network of agriculture related politicians to lead such a reform This key work is essential reading for researchers graduate students and master's level docents of the Common Agricultural Policy and more broadly European Union policy and reform

Textbook for Environmental Studies Dr Shaikh Ahmad Shaikh Ismail, 2019-03-05 This textbook is written to bring about an awareness of a variety of environmental concerns It covers a wide range of topics and issues about environmental science It attempts to create a pro environmental attitude and a behavioral pattern in society that is based on creating sustainable lifestyles But a textbook can hardly be expected to achieve a total behavioral change in society Conservation is best brought about through creating a love for nature

A Textbook On Basics Of Environmental Science Dr. Mithun Kumar Rathod, Kuna Sugunavathi, D. Annapurna, B. Karuna Kumari, 2023-02-22 The purpose of this textbook is to provide a comprehensive understanding of the basics of Environmental Science to undergraduate students pursuing various courses in science engineering and social sciences The book covers a broad spectrum of topics including the structure and function of ecosystems biodiversity pollution climate change renewable energy and sustainable development The book also delves into the role of government policies laws and regulations in protecting the environment and promoting sustainable practices Overall this textbook is a valuable resource for anyone interested in gaining a comprehensive understanding of the fundamentals of Environmental Science We hope that this book will inspire students to take an active interest in environmental issues and equip them with the knowledge and

skills to contribute to sustainable development *Textbook of Forest Science* Asim Kumar Mandal, Abel

Nicodemus, 2025-02-14 This textbook presents the latest knowledge on various disciplines of forestry science presented in 39 chapters. Each chapter presents a reappraisal of theory and practice applications and future scope of subject area. It is a single point reference for updated information on both traditional and contemporary areas of forestry. Some of the disciplines covered in the book are biotechnology, remote sensing, forest certification, forest management, forest hydrology, climate change, plantation and urban forestry, biodiversity and genetic resources conservation, wildfire science, seed science and quality seed production and ecosystem services. The book primarily serves as an advanced textbook of forest science for students of forestry at all levels. The science of forestry is receiving much more attention of the researchers, policy makers and public than ever before because of growing awareness of vital importance of forests in amelioration of world environment. This book is a comprehensive collection of existing and new methods including outcome and future possibilities of forest science. This book benefits undergraduate and postgraduate students, professional researchers, teachers, practicing foresters and policy planners. The book also encourages the public to understand the relevance of forest science to overcome the contemporary economic and environmental challenges.
