Critical Qualitative Research In Social Education:

Critical Qualitative Research in Social Education Cameron White, 2015-03-01 Critical qualitative research informs social education through a lens that ensures the investigation of issues in education tied to power and privilege ultimately leading to advocacy and activism The concept of critical is increasingly challenged in this age of neoliberal reform nevertheless critical implies questioning investigating and challenging in terms of equity and social justice leading to critical consciousness Freire 1970 While we resist defining social education as hopefully these ideas concepts are fluid the idea stems from a continual analysis and synthesis of critical theory critical pedagogy media and cultural studies social reconstruction social justice and social studies education framed by culturally responsive pedagogy A social education take on critical qualitative research thus suggests multiple truths and perspectives and focuses on questions rather than answers While many have written on qualitative educational research and some have attempted to integrate critical pedagogy and qualitative research few have explored the specific idea of social education and critical qualitative research A major issue is that social education claims that there are no set procedures scripted approaches or narrow definitions as to the possibilities of research endeavors Social education researchers make the process and investigation their own and adapt questions procedures methods and strategies throughout the experience This reflects an ever changing criticality in the bricolage of the research Steinberg 2011 Critical qualitative research and social education are vital for the world of the 21st century The onslaught of neoliberalism corporatization standardization testing and the continuing attack on public schools and educators necessitate critical approaches to teaching and learning along with critical qualitative research in social education Ongoing issues with equity and social justice tied to race ethnicity class orientation age and ability linking to schooling education teaching and learning must be addressed The struggle between unbridled capitalism and democracy warrant these investigations in the 21st century hopefully leading to advocacy and activism

Being Reflexive in Critical and Social Educational Research Geoffrey Shacklock, John Smyth, 2002-11 This text is a collection of case studies and readings on the subject of doing research in education It takes a personal view of the experience of doing research Each author presents a reflexive account of the issues and dilemmas as they have lived through them during the undertaking of educational research Coming from the researcher's own perspectives their positions are revealed within a wider space that can be personal political social and reflexive With this approach many issues such as ethics gender race validity reciprocity sexuality class voice empowerment authorship and readership are given an airing

Critical Theories, Radical Pedagogies, and Social Education, 2010-01-01 A refreshing collection of essays that offers a range of critical and radical voices which are generally marginalized in the critical social studies mainstream This collection is a good read with valuable insights that can impact teaching practice Canadian Social Studies Canada's National Social Studies Journal Volume 45 Issue 1 Award American Educational Studies Association AERA Critics Choice Book Award 2011 This edited collection begins with the assertion that

there are emergent and provocative theories and practices that should be part of the discourse on social studies education in the 21st century Anarchist eco activist anti capitalist and other radical perspectives such as disability studies and critical race theory are explored as viable alternatives in responding to current neo conservative and neo liberal educational policies shaping social studies curriculum and teaching Despite the interdisciplinary nature the field and a historical commitment to investigating fundamental social issues such as democracy human rights and social justice social studies theory and practice tends to be steeped in a reproductive framework celebrating and sustaining the status quo encouraging passive acceptance of current social realities and historical constructions rather than a critical examination of alternatives These tendencies have been reinforced by education policies such as No Child Left Behind which have narrowly defined ways of knowing as rooted in empirical science and apolitical forms of comprehension This book comes at a pivotal moment for radical teaching and for critical pedagogy bringing the radical debate occurring in social sciences and in activist circles where global protests have demonstrated the success that radical actions can have in resisting rigid state hierarchies and oppressive regimes worldwide to social studies education

Voices of Social Education Bernardo E. Pohl, Cameron White, Christine Beaudry, 2021-02-01

There is only one place where social education can occur and flourish through the voices that create a pedagogy of change And it is these voices where the most exciting and provocative moments can occur for those of us who are passionate about education teaching social justice equity and love As such social education is a journey an endeavor that makes us savor the experience of the journey more than the destination And social education is a journey that is enhanced through educator and student voices because it occurs in the most important spaces of our personal and professional lives It occurs in the hallways of the schools we teach in the staff meetings we attend in the mountain villages we venture to visit in the places we work and in the spaces we occupy Moreover social education is a unique kind of journey because it is a human experience that seldom occurs alone It happens with our colleagues and our loved ones It happens with our students administrators and other professionals who are fighting for the same things that we so fervently believe In the end social education occurs and flourishes in the trenches because it is the active pursuit of getting our hands dirty in our endless pursuit for a better and more just world Social education is also a narrative which takes on a different meaning for each one of us This is because sooner or later each person that embarks into the journey of social education develops its own personal definition of what social education entails through his or her own personal landscape and knowledge This personal landscape has been evolving since we were very young with some of the best examples of human courage and tenacity in the fight for social justice

Voices of Social Education A Pedagogy of Change is a collection of personal stories In this volume academics teachers students activists and artists share their personal stories of triumph tribulations and courage in their daily fight for social justice and equality The term social education is not defined as a set number of guidelines or a specific definition we give the term an organic fluency to stress that social education is a point of encounter a common space where we can share

with each other our experiences values and culture to form a more genuine and just social experience
