Teaching Tech Together Greg Wilson, 2019-10-08 Hundreds of grassroots groups have sprung up around the world to teach programming web design robotics and other skills outside traditional classrooms These groups exist so that people don t have to learn these things on their own but ironically their founders and instructors are often teaching themselves how to teach There s a better way This book presents evidence based practices that will help you create and deliver lessons that work and build a teaching community around them Topics include the differences between different kinds of learners diagnosing and correcting misunderstandings teaching as a performance art what motivates and demotivates adult learners how to be a good ally fostering a healthy community getting the word out and building alliances with like minded groups The book includes over a hundred exercises that can be done individually or in groups over 350 references and a glossary to help you navigate educational jargon

Conducting Educational Design Research Susan McKenney, Thomas Reeves, 2018-09-03 Educational design research blends scientific investigation with the systematic development and implementation of solutions to educational challenges Empirical inquiry is conducted in real learning settings not laboratories to craft effective solutions to the complex challenges facing educational practitioners At the same time the research is carefully structured to produce theoretical understanding that can serve the work of others Conducting Educational Design Research 2nd Edition has been written to support graduate students as well as experienced researchers who are new to this approach Part I describes the origins outcomes and generic approach Part II discusses the core processes of the generic approach in detail Part III recommends how to propose report and advance educational design research In addition to expanded treatment of research goals and practicalities more examples and attention to design based implementation research this new edition features enhanced guidance For each of the four core processes this volume offers assessment tools detailed behind the scenes descriptions of actual project work examples of how specific theories have been used to enrich the work For decades policies for educational research worldwide have swung back and forth between demanding rigor above all other concerns and increasing emphasis on impact These two qualities rigor and impact need not

be mutually exclusive This volume supports readers in grasping and realizing the potential of educational design research It demonstrates how rigorous and relevant investigation can yield both theoretical understanding and solutions to urgent educational challenges

Active Learning: Theoretical Perspectives, Empirical Studies and Design Profiles Robert Cassidy,Elizabeth S. Charles,James D. Slotta,Nathaniel

Lasry,2019-07-11 This book represents the emerging efforts of a growing international network of researchers and practitioners to promote the development and uptake of evidence based pedagogies in higher education at something a level approaching large scale impact By offering a communication venue that attracts and enhances much needed partnerships among practitioners and researchers in pedagogical innovation we aim to change the conversation and focus on how we work and learn together i e extending the implementation and knowledge of co design methods In this first edition of our Research Topic on Active Learning we highlight two of the three types of publications we wish to promote First are studies aimed at understanding the pedagogical designs developed by practitioners in their own practices by bringing to bear the theoretical lenses developed and tested in the education research community These types of studies constitute the practice pull that we

see as a necessary counterbalance to knowledge push in a more productive pedagogical innovation ecosystem based on research practitioner partnerships Second are studies empirically examining the implementations of evidence based designs in naturalistic settings and under naturalistic conditions Interestingly the teams conducting these studies are already exemplars of partnerships between researchers and practitioners who are uniquely positioned as in between straddling the two worlds As a result these publications represent both the rigours of research and the pragmatism of reflective practice In forthcoming editions we will add to this collection a third type of publication design profiles These will present practitioner developed pedagogical designs at varying levels of abstraction to be held to scrutiny amongst practitioners instructional designers and researchers alike We hope by bringing these types of studies together in an open access format that we may contribute to the development of new forms of practitioner researcher interactions that promote co design in pedagogical innovation

Kirschner, Maren Scheffel, Stefanie Lindstaedt, Vania Dimitrova, 2010-09-15 These proceedings of the 5th European Conference on Technology Enhanced Learning EC TEL 2010 exemplify the highly relevant and successful research being done in TEL Because of this great work this year's conference focused on Sustaining TEL From Innovation to Learning and Practice The last decade has seen significant investment in terms of effort and resources i.e. time people and money in innovating education and training The time has come to make the bold step from small scale innovation research and development to large scale and sustainable implementation and evaluation It is time to show the world i.e. government industry and the general population that our field has matured to the stage that sustainable learning and learning practices both in schools and in industry can be achieved based upon our work The present day TEL community now faces new research questions related to large scale deployment of technology enhanced learning supporting individual learning environments through mashups and social software new approaches in TEL certification and so forth Furthermore new approaches are required for the design implementation and use of TEL to improve the understanding and communication of educational desires and the needs of all stakeholders ranging from researchers to learners tutors educational organizations companies the TEL industry and policy makers And the TEL community has taken up this challenge As one can see in this volume in its 5th year the conference was once more able to assemble the most prominent and relevant research results in the TEL area The conference generated more than 150 submissions which demonstrates a very lively interest in the conference theme thus significantly contributing to the conference's success

Women in STEM Education Lisbet Rønningsbakk, Karen Blackmore, 2023-12-05 We are delighted to present the inaugural Women in Education series of article collections At present less than 30% of researchers worldwide are women Long standing biases and gender stereotypes are discouraging girls and women away from science related fields and from pursuing a career in academia and in different professional environments especially when linked to STEM fields Science and gender equality are however essential to ensure sustainable development in all

disciplines In order to change traditional mindsets gender equality must be promoted stereotypes defeated and girls and women should be encouraged to pursue academic careers Therefore Frontiers in Education is proud to offer this platform to promote the work of women scientists educators and professionals across all fields of STEM Education Female representation still needs to be improved in key roles in the field and the way in which an equitable education contributes to fairer and less biased academic and professional environments worldwide should be more investigated The work presented here highlights the diversity of research performed across the entire breadth of STEM Education research and presents advances in theory experiment and methodology with applications to compelling problems
