Zaccagnini & White's Core Competencies for Advanced Practice Nursing: A Guide for DNPs Diane Schadewald,2024-01-04 Zaccagnini White s Core Competencies for Advanced Practice Nursing A Guide for DNPs Fifth Edition continues to be the only textbook intended as the go to resource to help students understand what it means to be a DNP Across the nation Doctorate of Nursing Practice DNP programs can now be found in every state with program growth continuing In April 2021

the AACN released the new Essentials Core Competencies for Professional Nursing practice. Prevention Practice in Primary Care Sherri Sheinfeld Gorin, 2014. A Guide to Psychosocial and Spiritual Care at the End of Life Henry S. Perkins, 2017-03-17. Psychological, social and spiritual care is as important as physical care at the end of life. Yet caregivers often feel ill equipped to give that nonphysical care. This book shows how to do it. The book addresses all caregivers who attend dying patients: doctors, nurses, chaplains, clergy in the pastorate, social workers, clinical psychologists, family caregivers and others. It covers such topics as the functional and emotional trajectories of dying, the varied approaches of patients and caregivers to end of life decisions, culturally based beliefs about dying, the differences between depression and grief, and people's views about the right time to die, the death experience itself and the afterlife. For each topic, the book introduces core concepts and summarizes recent research about them. The book presents much of its material in readable tables for easy reference, applies the material to real life cases, lists the main take home points for each chapter and gives references for additional reading. The book helps caregivers anticipate the reactions of patients and survivors to end of life traumas and suggests how caregivers can respond insightfully and compassionately. At the same time, the book challenges caregivers to think through their own views about death and dying. This book therefore is a must read for all caregivers, professional and nonprofessional alike, who strive to give their patients comprehensive high quality end of life care.

Green Voices Richard D. Besel, Bernard K. Duffy, 2016-02-25. Essays addressing relatively unknown or unexamined speeches delivered by famous or influential environmental figures. The written works of nature's leading advocates from Charles Sumner and John Muir to Rachel Carson and President Jimmy Carter to name a few have been the subject of many texts, but their speeches remain relatively unknown or unexamined. Green Voices aims to redress this situation. After all, when it comes to the leaders, heroes and activists of the environmental movement, their speeches formed part of the fertile earth from which uniquely American environmental expectations, assumptions and norms germinated and grew. Despite having in common a definitively rhetorical focus, the contributions in this book reflect a variety of methods and approaches. Some concentrate on a single speaker and a single speech. Others look at several speeches. Some are historical in orientation while others are more theoretical. In other words, this collection examines the broad sweep of US environmental history from the perspective of our most famous and influential environmental figures.
