Book List ,1984 Cars , **Introduction to Advertising** Emmanuel Mogaji,2021-05-30 This book is an introductory roadmap to the advertising process Advertising is explored as a creative communication message from a brand created by advertising agencies and distributed across different media to target the right consumers The book provides an understanding of the benefits of advertising its role in the economy and even more so acknowledges that advertisements are not only about selling but also about effectively communicating a message The creative and conceptual approach towards the communication process is discussed and insight is presented into the dynamics within the industry and the different stakeholders involved while recognising how different creative elements in advertisements are consciously selected to make them appealing Finally it considers how to analyse and measure an advert s effectiveness and looks ahead to future ideas and technologies arising in advertising Effectively combining theory with practical insight each chapter begins with learning objectives and ends with key learnings International case studies feature throughout including insights from British Gas WPP Audi and KFC as well as other examples from smaller organisations and the non profit sector Taking students step by step through the advertising process it is important reading for undergraduate and postgraduate students studying Advertising Brand Management Marketing Communications and Media Planning Advertising, Values and Social Change Maria Angela Polesana,2019-08-06 This book provides a snapshot of the major social cultural and economic changes that have taken place in the contemporary consumer society following the global financial crisis of 2008 It discusses brands consumption patterns and advertising and highlights their symbolic component Markets are conversations as the Cluetrain Manifesto pointed out as early as 2000 and this is all the more so today in our increasingly digitalized society Advertising therefore needs to attune products to the most interesting conversations those that are consistent with the new sensibility of the individual identifying the languages which reflect most closely the new values and which are most useful for effective storytelling The analysis here focuses on Italian advertising but the language categories described are in tune with the new Zeitgeist which faced with the challenge of climate change and the crisis of unlimited economic growth demands a more informed and responsible approach to consumption globally The book is therefore useful for those working in corporate communication advertising agencies universities and Italian cultural organizations *Media, Masculinities, and the Machine*

Dan Fleming, Damion Sturm, 2011-04-28 *Media Masculinities and the Machine* identifies a distinctive phenomenon in today's media culture: the contemporary male fantasy of suiting up and pushing technology to its limits. The authors deconstruct this fantasy using two in-depth studies from American, British, and global media: the social imagining of hi-tech in the long-running Transformers franchise and global Formula One motorsport, with links to numerous other areas of contemporary culture. By drawing on non-representational theory and the latest theories of affect while employing the method of autoethnography to explore what boys and men want and say, the book offers a timely contribution to our understanding of contemporary cultural attachments. The book provides informative accounts of two instances united by their apparent gender focus and by their interest in ways of imagining high-tech. Tracking their theme through TV, cinema, toys, magazines, merchandising, and the culture of the gadget, the authors raise important questions about mediated masculinities today and propose a new theoretical framework for uncovering what is going on.
