Research into material culture has become one of the most important fields in medieval and early modern studies. While past research focused primarily on the objects as such, present interests have moved to humans and their ties to things. This volume concentrates on the perception of medieval and early modern material culture in particular exceptional objects that can be seen as favourite things. Contributions lead from theoretical issues to specific groups of objects, their exclusivity and function as social markers. The analyses address both religious and secular space. *Höfische Pracht der Augsburger Goldschmiedekunst* Lorenz Seelig, 1995. An exhibition held at the Bayerisches Nationalmuseum in Munich in 1994 gathered together for the first time masterpieces of the Augsburg goldsmiths and silversmiths' art that had been created for numerous princely and royal courts throughout Europe. Objects now scattered among major museums in Moscow, St Petersburg, Copenhagen, Berlin, Dresden and Vienna were reunited in a display that drew ecstatic responses from public and critics alike. This book provides a photographic documentation of pieces shown in the exhibition, including several details that reveal their superlative quality. The items included in this feast for the eye range from the sixteenth to the eighteenth century, from extravagant late Renaissance table automata and magnificent Baroque display buffets to elegant Rococo toilet sets. The introductory essay traces the development of the goldsmiths' and silversmiths' craft in Augsburg and places the illustrated works in their stylistic and historical contexts.
