Citizenship Across Borders The Political Transnationalism Of El Migrante:

Citizenship Across Borders Michael P. Smith, Matt Bakker, 2008 Citizenship across Borders offer a new way of looking at the emergent dynamics of transnational community development and electoral politics on both sides of the border

Citizenship across Borders Michael Peter Smith, Matt Bakker, 2011-05-02 Michael Peter Smith and Matt Bakker spent five years carrying out ethnographic field research in multiple communities in the Mexican states of Zacatecas and Guanajuato and various cities in California particularly metropolitan Los Angeles Combining the information they gathered there with political economic and institutional analysis the five extended case studies in Citizenship across Borders offer a new way of looking at the emergent dynamics of transnational community development and electoral politics on both sides of the border Smith and Bakker highlight the continuing significance of territorial identifications and state policies particularly those of the sending state in cultivating and sustaining transnational connections and practices In so doing they contextualize and make sense of the complex interplay of identity and loyalty in the lives of transnational migrant activists In contrast to high profile warnings of the dangers to national cultures and political institutions brought about by long distance nationalism and dual citizenship Citizenship across Borders demonstrates that far from undermining loyalty and diminishing engagement in U S political life the practice of dual citizenship by Mexican migrants actually provides a sense of empowerment that fosters migrants active civic engagement in American as well as Mexican politics

Contesting Citizenship Anne McNevin, 2011-06-28 Irregular migrants complicate the boundaries of citizenship and stretch the parameters of political belonging Comprised of refugees asylum seekers illegal labor migrants and stateless persons this group of migrants occupies new sovereign spaces that generate new subjectivities Investigating the role of irregular migrants in the transformation of citizenship Anne McNevin argues that irregular status is an immanent rather than aberrant condition of global capitalism formed by the fast tracked processes of globalization McNevin casts irregular migrants as more than mere victims of sovereign power shuttled from one location to the next Incorporating examples from the United States Australia and France she shows how migrants reject their position as illegal outsiders and make claims on the communities in which they live and work For these migrants outsider status operates as both a mode of subjectification and as a site of active resistance forcing observers to rethink the enactment of citizenship McNevin connects irregular migrant activism to the complex rescaling of the neoliberal state States increasingly prioritize transnational market relations that disrupt the spatial context for citizenship At the same time states police their borders in ways that reinvigorate territorial identities Mapping the broad dynamics of political belonging in a neoliberal era McNevin provides invaluable insight into the social and spatial transformation of citizenship sovereignty and power

Migrant Transnationalism Özge Bilgili, Marta Bivand Erdal, 2025-07-22 This open access short reader provides a compelling introduction to research on migrant transnationalism The short reader focuses on the significant area of remittances in financial terms However attention is also paid to political

social cultural and religious transfers and exchanges underscoring the salience of the wide range of ties that are maintained across borders Increasingly such ties are sustained through virtual and technology facilitated modes of interaction Drawing on established and recent empirical research from across the globe in dialogue with scholars of migrant transnationalism the book offers an overview of approaches conceptual tools thematic areas and methods of investigation Thus this short reader sheds light on the fundamentals of existing knowledge on migrant transnationalism What are the key questions in migrant transnationalism research today How does a transnational perspective deepen our understanding of migration social mobility diversity inclusion and development As a source for researchers students and policy makers this short reader is essential reading which shows why looking at the world through a transnational lens adds value for anyone interested in migration and social change

Translocal Geographies Ayona Datta, Katherine Brickell, 2016-02-17 Bringing together a wide range of original empirical research from locations and interconnected geographical contexts from Europe Australasia Asia Africa Central and Latin America this book sets out a different agenda for mobility one which emphasizes the enduring connectedness between and embeddedness within places during and after the experience of mobility These issues are examined through the themes of home and family neighbourhoods and city spaces and allow the reader to engage with migrants diverse practices which are specifically local yet spatially global This book breaks new ground by arguing for a spatial understanding of translocality that situates the migrant experience within across particular locales without confining it to the territorial boundedness of the nation state It will be of interest to academics and students of social and cultural geography anthropology and transnational studies

The Oxford Handbook of Citizenship Ayelet Shachar, Rainer Bauboeck, Irene Bloemraad, Maarten Vink, 2017-08-03 Contrary to predictions that it would become increasingly redundant in a globalizing world citizenship is back with a vengeance The Oxford Handbook of Citizenship brings together leading experts in law philosophy political science economics sociology and geography to provide a multidisciplinary comparative discussion of different dimensions of citizenship as legal status and political membership as rights and obligations as identity and belonging as civic virtues and practices of engagement and as a discourse of political and social equality or responsibility for a common good The contributors engage with some of the oldest normative and substantive quandaries in the literature dilemmas that have renewed salience in today's political climate As well as setting an agenda for future theoretical and empirical explorations this Handbook explores the state of citizenship today in an accessible and engaging manner that will appeal to a wide academic and non academic audience Chapters highlight variations in citizenship regimes practiced in different countries from immigrant states to non western contexts from settler societies to newly independent states attentive to both migrants and those who never cross an international border Topics include the selling of citizenship multilevel citizenship in between statuses citizenship laws post colonial citizenship the impact of technological change on citizenship and other cutting edge issues This Handbook is the major reference work for those engaged with citizenship from

a legal political and cultural perspective Written by the most knowledgeable senior and emerging scholars in their fields this comprehensive volume offers state of the art analyses of the main challenges and prospects of citizenship in today s world of increased migration and globalization Special emphasis is put on the question of whether inclusive and egalitarian citizenship can provide political legitimacy in a turbulent world of exploding social inequality and resurgent populism **Emigrants**

Get Political Michael S. Danielson,2018 Migrants have become an important social and political constituency throughout the world In addition to sending remittances to their home countries many migrants maintain political ties with their nations of origin through the expansion of dual citizenship and voting rights But to what extent do migrants influence their home communities and governments Michael S Danielson develops a theory of and methodological model for studying migrant impact on the communities and countries they leave behind examining a largely underexplored area of research in the migration literature

Making Citizenship Work Rodolfo Rosales,2022-08-24 Making Citizenship Work seeks to address questions of how a community reaches a place where it can actually make citizenship work A second question addressed is What does citizenship represent to different communities Across thirteen chapters a collection of experts traverse multiple disciplines in analyzing citizenship from different points of access Each chapter revolves around the premise that empowerment of communities and individuals within the community comes in different forms and is governed by multiple needs and visions Authors utilize case studies to demonstrate the different roles that communities from a broad sector of our society adopt to accomplish constructing democratic processes that reflect their goals needs and cultures Concurrently authors address the structural obstacles to the empowerment of communities arguing that the democratic process does not and cannot accommodate the diverse communities of society within a single universalistic model of citizenship They conclude that fundamentally citizenship is not simply a legal right an obligation a state of rights but a practice an action on the behalf of community Making Citizenship Work challenges conventional thinking about politics while also encouraging readers to go beyond the box that deters us from visualizing a human society It is an ideal book for undergraduate and graduate courses in political science sociology history social work and Ethnic Studies *Precarity and Belonging* Catherine S. Ramírez,Sylvanna M. Falcón,Juan Poblete,Steven C. McKay,Felicity Amaya Schaeffer,2021-06-18

Approaching mobility precarity and citizenship at once generates a critical exploration of the points of contact and friction and the potential politics of commonality between citizens and noncitizens What does modern citizenship mean in a world of citizens denizens and noncitizens living under common conditions of labor and social precarity Precarity and Belonging interrogates such binaries as citizen noncitizen and legal illegal to explore the fluidity of the spectra of belonging **The State and the Grassroots** Alejandro Portes,Patricia Fernández-Kelly,2015-07-01 Whereas most of the literature on migration focuses on individuals and their families this book studies the organizations created by immigrants to protect themselves in their receiving states Comparing eighteen of these grassroots organizations formed across the world from India to Colombia to Vietnam to the Congo researchers from the

United States Belgium France the Netherlands and Spain focus their studies on the internal structure and activities of these organizations as they relate to developmental initiatives The book outlines the principal positions in the migration and development debate and discusses the concept of transnationalism as a means of resolving these controversies
