Citrix User Profile Management (UPM) deployment

POSTED ON DECEMBER 7, 2015 BY LUKASZ SLEMP

One of the key features that leverages proper user's experience in application provisioning or VDI environments is profile management. Whenever users log on to their VD or provisioned applications they are expecting to see things as they left it – that starts with desktop personalization, regional settings, wallpaper and ends up with complex application specific settings like AutoCAD or Catia preferences, shortcuts or hot-keys. Depending on delivered infrastructure type – profile management may be simple, but it also may become complex and challenging for IT.

Unfortunately – some things cannot be achieved with Windows Roaming Profiles – example from my experience is Microsoft Outlook which holds user settings (like signature, font styles, views, etc) in user's AppData/Local folder which is not synchronized by default (and we don't want it's all content which can be done in registry). Luckily, Citrix engineers gave us an option to specify folders / files to synchronize across all user's profile directory. Below you can find a list of Citrix UPM benefits.

Consistent Experience: Increases user satisfaction and improves productivity

- **Reliable roaming experience:** Ensures that personal settings, documents, shortcuts, templates, desktop wallpapers, cookies and favorites always follow the user across different Windows environments on any device.
