**Sociable Cities** Peter Hall, Colin Ward, 2014-06-05 Peter Hall and Colin Ward wrote *Sociable Cities* to celebrate the centenary of

publication of Ebenezer Howard's *To-morrow: A Peaceful Path to Real Reform* in 1998 an event they then marked by co-editing with Dennis Hardy the magnificent annotated facsimile edition of Howard's original long lost and very scarce in 2003. In this revised edition of *Sociable Cities* sadly now without Colin Ward Peter Hall writes the sixteen years separating the two editions of this book seem almost like geological time. Revisiting the 1998 edition is like going back deep into ancient history. The glad confident morning following Tony Blair's election has been followed by political disillusionment, the fiscal crash, widespread austerity and a marked anti-planning stance on the part of the Coalition government. But closely following the argument of *Good Cities Better Lives: How Europe discovered the Lost Art of Urbanism* (Routledge 2013) to which this book is designed as a companion Hall argues that the central message is now even stronger: we need more planning, not less. And this planning needs to be driven by broad high level strategic visions, national, regional, of the kind of country we want to see. Above all Hall shows in the concluding chapters Britain's escalating housing crisis can be resolved only by a massive programme of planned decentralization from London at least equal in scale to the great Abercrombie plan seventy years ago. He sets out a picture of great new city clusters at the periphery of South East England sustainably self-sufficient in their daily patterns of living and working but linked to the capital by new high speed rail services. This is a book that every planner and every serious student of policy making will want to read. Published at a time when the political parties are preparing their policy manifestos it is designed to make a major contribution to a major national debate. **Festival Cities** John R.

Gold, Margaret M. Gold, 2020-12-03 Festivals have always been part of city life but their relationship with their host cities has continually changed. With the rise of industrialization they were largely considered peripheral to the course of urban affairs. Now they have become central to new ways of thinking about the challenges of economic and social change as well as repositioning cities within competitive global networks. In this timely and thought provoking book John and Margaret Gold provide a reflective and evidence based historical survey of the processes and actors involved charting the ways that regular festivals have now become embedded in urban life and city planning. Beginning with David Garrick's rain drenched Shakespearean Jubilee and ending with Sydney's flamboyant Mardi Gras celebrations it encompasses the emergence and consolidation of city festivals. After a contextual historical survey that stretches from Antiquity to the late nineteenth century there are detailed case studies of pioneering European arts festivals in their urban context: Venice's Biennale, the Salzburg Festival, the Cannes Film Festival and Edinburgh's International Festival. Ensuing chapters deal with the worldwide proliferation of arts festivals after 1950 and with the ever increasing diversification of carnival celebrations particularly through the actions of groups seeking to assert their identity. The conclusion draws together the book's key themes and sketches the future prospects for festival cities. Lavishly illustrated and copiously researched this book is essential reading not just for urban geographers, social historians and planners but also for anyone interested in contemporary festival and events, tourism, urban events strategy, urban regeneration, regeneration or simply building a fuller understanding of the

relationship between culture planning and the city      **Planning the Great Metropolis** David A. Johnson, 2015-01-09 As the Regional Plan Association embarks on a Fourth Regional Plan there can be no better time for a paperback edition of David Johnson's critically acclaimed assessment of the 1929 Regional Plan of New York and Its Environs As he says in his preface to this edition the questions faced by the regional planners of today are little changed from those their predecessors faced in the 1920s Derided by some accused by others of being the root cause of New York City's relative economic and physical decline the 1929 Plan was in reality an important source of ideas for many projects built during the New Deal era of the 1930s In his detailed examination of the Plan Johnson traces its origins to Progressive era and Daniel Burnham's 1909 Plan of Chicago He describes the making of the Plan under the direction of Scotsman Thomas Adams its reception in the New York Region and its partial realization The story he tells has important lessons for planners decision makers and citizens facing an increasingly urban future where the physical plan approach may again have a critical role to play      Good Cities, Better Lives Peter Hall, 2013-09-11 This book has one central theme how in the United Kingdom can we create better cities and towns in which to live and work and play What can we learn from other countries especially our near neighbours in Europe And in turn can we provide lessons for other countries facing similar dilemmas Urban Britain is not functioning as it should Social inequalities and regional disparities show little sign of going away Efforts to generate growth and spread it to the poorer areas of cities have failed dismally Much new urban development and redevelopment is not up to standard Yet there are cities in mainland Europe which have set new standards of high quality sustainable urban development This book looks at these best practice examples in Germany the Netherlands France and Scandinavia and suggests ways in which the UK and other countries could do the same The book is in three parts Part 1 analyses the main issues for urban planning and development in economic development and job generation sustainable development housing policy transport and development mechanisms and probes how practice in the UK has fallen short Part Two embarks on a tour of best practice cities in Europe starting in Germany with the country's boasting of its cities economies moving to the spectacularly successful new housing developments in the Netherlands from there to France's integrated city transport then to Scandinavia's pursuit of sustainability for its cities and finally back to Germany to Freiburg the city that did it all Part Three sums up the lessons of Part Two and sets out the key steps needed to launch a new wave of urban development and regeneration on a radically different basis      **The Planning Imagination** Mark Tewdwr-Jones, Nicholas Phelps, Robert Freestone, 2013-10-01 Knighted in 1998 for services to the Town and Country Planning Association and in 2003 named by Her Majesty Queen Elizabeth II as a Pioneer in the Life of the Nation Peter Hall is internationally renowned for the breadth and depth of his studies and writings on urban and regional planning For the last 50 years he has captured and helped to create the planning imagination Here the editors have brought together in five themes a series of critical reflections on Peter's vast and diverse contributions Those reflections are provided by colleagues familiar with his work The five parts are

devoted to Peter Hall's breadth of academic work covering the history of cities and planning London spatial planning connectivity and mobility and urban globalization Finally as a sixth part the editors have asked Peter Hall himself to reflect on his career and the sources of his imagination The story this book tells is not one of a singular totally consistent theoretical and philosophical view elaborated over several decades Rather it covers a set of views that necessarily admits signs of Peter's inconsistency and imperfection over the years the insights and imperfections that inevitably accompany the exercise of a nonetheless remarkably fertile restless and inspiring planning imagination      **Staging the New Berlin** Claire

Colomb, 2013-06-17 This book explores the politics of place marketing and the process of urban reinvention in Berlin between 1989 and 2011 In the context of the dramatic socio economic restructuring processes changes in urban governance and physical transformation of the city following the Fall of the Wall the new Berlin was not only being built physically but staged for visitors and Berliners and marketed to the world through events and image campaigns which featured the iconic architecture of large scale urban redevelopment sites Public private partnerships were set up specifically to market the new Berlin to potential investors tourists Germans and the Berliners themselves The book analyzes the images of the city and the narrative of urban change which were produced over two decades In the 1990s three key sites were turned into icons of the new Berlin the new Postdamer Platz the new government quarter and the redeveloped historical core of the Friedrichstadt Eventually the entire inner city was staged through a series of events which turned construction sites into tourist attractions New sites and spaces gradually became part of the 2000s place marketing imagery and narrative as urban leaders sought to promote the creative city By combining urban political economy and cultural approaches from the disciplines of urban politics geography sociology and planning the book contributes to a better understanding of the interplay between the symbolic politics of representation through place marketing and the politics of urban development and place making in contemporary urban governance      *Supergrid and Superblock* Xiaofei Chen, 2022-10-03 In this superbly illustrated book

Xiaofei Chen presents the first analysis in English of a ubiquitous East Asian urban phenomenon the supergrid and superblock urban structure The book opens with an introductory essay by Barrie Shelton in which he sets the scene for what is to follow emphasizing how alien this structure was to Western urban design culture where radial patterns of development were the norm Then in her first chapter Chen explains the make up of the supergrid and superblock urban structure and its contrasting Chinese and Japanese forms In the following three chapters she digs deep into the history cultural origins and underlying design philosophy of the supergrid and superblock to show how under different cultural influences the model has developed into two distinct forms Two further chapters 5 and 6 provide detailed analysis of two sample superblocks in China in Xi'an and Nanjing and two in Japan in Kyoto and Osaka to reveal the relative advantages and disadvantages of how the structure is manifest in the two countries In her conclusion she discusses her findings to show how and why the supergrid and superblock structure is a valuable urban design model which with regional adjustments can be used effectively in cities

other than those of East Asia
