Architectural Philosophy Andrew Benjamin, 2000-10-01 Architectural Philosophy is the first book to outline a philosophical account of architecture and to establish the singularity of architectural practice and theory This dazzling sequence of essays opens out the subject of architecture touching on issues as wide ranging as the problem of memory and the dystopias of science fiction Arguing for the indissolubility of form and function Architectural Philosophy explores both the definition of the site and the possibility of alterity The analysis of the nature of the present and the complex structure of repetition allows for the possibility of judgement a judgement that arises from a reworked politics of architecture *The Philosophy of Design* Glenn Parsons, 2015-12-22 The Philosophy of Design is an introduction to the fundamental philosophical issues raised by the contemporary practice of design The first book to systematically examine design from the perspective of contemporary philosophy it offers a broad perspective ranging across key philosophical areas such as aesthetics epistemology metaphysics and ethics The first part of the book explores central issues about the nature of design and its products and the rationality of design methods A central theme is that Modernist ideas such as those offered by Loos and Gropius provide important responses to these philosophical issues In the second part of the book these Modernist ideas serve as touchstones in the exploration of key issues for design including the place of aesthetics in design designs relation to personal expression the meaning of function and designs relation to consumerism The social responsibility of designers and the impact of design practice on ethical reasoning are also discussed Written in an accessible style The Philosophy of Design presents a new perspective on design and a provocative reassessment of the Modernist legacy It will engage students and designers with current philosophical debates helping them to bring into clearer focus the meaning of contemporary design and its unique challenges and possibilities The Global Architect Donald McNeill, 2009-06-02 The Global Architect explores the increasing significance of globalization processes on urban change architectural practice and the built environment In what is primarily a critical sociological overview of the current global architectural industry Donald McNeill covers the star system of international architects who combine celebrity and hypermobility the top firms whose offices are currently undergoing a major global expansion and the role of advanced information technology in expanding the geographical scope of the industry **Daniel Libeskind** Moleskine, 2015-12-30 Influenced by a deep commitment to music philosophy and literature the world renowned architect Daniel Libeskind chooses drawing to put his ideas and thoughts into practice stating that architectural drawing is in itself a creative work Drawings which constitute architectural explorations from Micromegas to Chamber Works and Sonnets in Babylon are presented in this book along with those on real architecture documenting the creative process of prestigious projects such as the Jewish Museum in Berlin and the World Trade Center redevelopment in New York A Philosophy of Chinese Architecture David Wang, 2016-12-08 A Philosophy of Chinese Architecture Past Present Future examines the impact of Chinese philosophy on China's historic structures as well as on modern Chinese urban

aesthetics and architectural forms For architecture in China moving forward author David Wang posits a theory the New Virtualism which links current trends in computational design with long standing Chinese philosophical themes The book also assesses twentieth century Chinese architecture through the lenses of positivism consciousness phenomenology and linguistics structuralism and poststructuralism Illustrated with over 70 black and white images this book establishes philosophical baselines for assessing architectural developments in China past present and future Anti-architecture and Deconstruction Nikos Angelos Salingaros,2004 The Emperor Has No Clothes is an old adage but in the sad case of Deconstructivism it is absolutely appropriate as Deconstructivism is really nothing more than Modernism in a new guise Modernists notably the Bauhaus aimed for the clean slate jettisoning everything that went before Yet at times they claimed links with antecedents to give a spurious historical ancestry to their aims and creations These questionable links and precedents are now being claimed for the works of Deconstructivists by sympathetic architects and their supporters

Lindstrom,2021-03-21 Kenosis Creativity Architecture locates and explores creativity's grounding in the ancient concept of kenosis the emptying that allows creativity to happen that makes appearance possible It concretises that grounding through architecture a primal expression of human creativity critically examining for the first time kenotic instantiations evidenced in four iconic international projects works by Kahn Pei Ando and Libeskind Then in a final turn the potentiality of architecture's own emptying is probed Architect and author Randall Lindstrom draws on Western and Eastern philosophy including that of Heidegger Levinas Derrida Vattimo Nishida and Nishitani as well as on the theology of Christianity Judaism and aspects of Buddhism Hinduism and Islam Every chapter expands the argument that if responsiveness to our world is taken seriously if proper and sustainable responses are to be realised then a deeper understanding of creativity and so kenosis is essential This book opens up a way of thinking about creativity and humanity's readiness to be creative It thereby presents a crucial enquiry at the nexus of architecture philosophy and theology for researchers graduate and postgraduate students and practitioners alike **Daniel Libeskind** Antonello Marotta,2013-06-30 The book in your hands is a complete mature work of
