noir from the proto noir elements of Feuillade's silent French crime series and German Expressionism to the genre's mid twentieth century popularization and influence on contemporary global media By employing experimental lighting effects oblique camera angles distorted compositions and shifting points of view film noir's style both creates and comments upon a morally adumbrated world where the alienating effects of the uncanny the fetishistic and the surreal dominate What drew original audiences to film noir is an immediate recognition of this modern social and psychological reality Much of the appeal of film noir concerns its commentary on social anxieties its cynical view of political and capitalist corruption and its all too brutal depictions of American modernity This book examines the changing often volatile shifts in representations of masculinity and femininity as well as the genre's complex relationship with Afro American culture observable through noir's musical and sonic experiments Key features

- Discusses the influence of literary and artistic sources on the development of film noir
