Dilley, 2013-05-02 Darwinian Evolution and Classical Liberalism canvasses an array of thinkers from the past to the present as it examines fundamental political philosophical ethical economic anthropological and scientific aspects of the ferment between Darwinian biology and classical liberalism Early chapters focus on classical thinkers like John Locke and Adam Smith while later chapters provide analyses of present day classical liberals focusing especially on F A Hayek Thomas Sowell and Larry Arnhart the most prominent advocates of contemporary classical liberalism Thematically the volume falls into three parts Part I examines foundational matters arguing that Darwinism and classical liberalism hold incompatible visions of morality human nature and individual autonomy This section also contends that the free market s spontaneous order is fully compatible with a teleological or non Darwinian view of the universe Part II turns to contemporary applications contending that Darwinism and classical liberalism are at odds in their views of or implications about limited government vital religion economic freedom and the traditional family This section also argues that since its inception Darwinism has attenuated core tenets and values of classical liberalism and Western civilization Part III of the volume contains alternative views to those in the first two parts adding critical diversity to the book Respectively these chapters hold that Darwinian evolution simply has little to say about classical liberalism an evolutionary account of human volition is fully compatible with the individual choice presupposed in classical liberalism and evolutionary naturalism unlike religious alternatives provides a strong foundation for freedom morality and the traditional family

The Defenders of Liberty Neema Parvini, 2020-05-01 The Defenders of Liberty presents a history of economic liberalism from the Renaissance to the present It chronicles the tradition of thought that sees human nature as social yet self interested methodological individualism as its key analytical tool and property rights as foundational to a civilised society In the development of this way of thinking it considers the contributions of many key thinkers including Niccol Machiavelli Thomas Hobbes John Locke Richard Cantillon A J R Turgot David Hume Adam Smith Nassau William Senior Richard Cobden Herbert Spencer Jean Baptiste Say Carl Menger William Stanley Jevons Gaetano Mosca Eugen B hm Bawerk Vilfredo Pareto Phillip Wicksteed Edwin Cannan Ludwig von Mises Lionel Robbins F A Hayek W H Hutt Milton Friedman George Stigler Murray N Rothbard James M Buchanan and Thomas Sowell The book contends that liberalism needs to be grounded in realism and that it has been derailed whenever economists have deviated from an explicitly realist understanding of human nature individualism and property rights It argues that the cause of liberalism was compromised by errors in economic reasoning by such major figures as David Ricardo John Stuart Mill Alfred Marshall A C Pigou and John Maynard Keynes In diagnosing what has gone wrong for liberalism in the twenty first century The Defenders of Liberty argues against substituting mathematical abstraction for causal realism it opposes interventionist central banking it seeks to recover economic liberalism from social and political liberalism which are somewhat unrelated schools of thought it resists a view of human nature rooted in selfishness or atomised individualism and finally alerts defenders of freedom to the ruthless but effective language games played by their opponents This book will be of interest to the educated general reader as well as undergraduates and

postgraduates in disciplines such as economics political theory and philosophy Media, Culture and Human Violence Jeff Lewis, 2015-11-18 Humans of the advanced world are the most violent beings of all times This violence is evident in the conditions of perpetual warfare and the accumulation of the most powerful and destructive arsenal ever known to humankind It is also evident in the devastating impact of advanced world economy and cultural practices which have led to ecological devastation and the current era of mass species extinction one of only six mass extinction events in planetary history and the only one caused by the actions of a single species humans This violence is manifest in our interpersonal relationships and the ways in which we organize ourselves through hierarchical systems that ensure the wealth and privilege of some against the penury and misery of others In this new and highly original book Jeff Lewis argues that violence is deeply inscribed in human culture thinking and expressive systems media Lewis contends that violence is not an inescapable feature of an aggressive human nature Rather violence is laced through our desires and dispositions to communalism and expressive interaction From the near extinction of all Homo sapiens around 74 000 years ago the invention of culture and media enabled humans to imagine and articulate particular choices and pleasures Organized intergroup violence or warfare emerged through the exercise of these choices and their expression through larger and increasingly complex human societies This agitation of amplified desire hierarchical social organization and mediated knowledge systems has created a cultural volition of violent complexity which continues into the present Media Culture and Human Violence examines the current conditions of conflict and harm as an expression of our violent complexity **Non-Design** Anthony Fontenot, 2021-07-09 Introduction Planned order versus spontaneous order New brutalism and the critique of socialism non design and the new visual order The borax debates from modern design to non design Spontaneous city Jane Jacobs and the critique of planned order Chaos or control non design and the American city The indeterminate city Conclusion Evolution Science and Ethics in the Third Millennium Robert Cliquet, Dragana Avramov, 2018-01-10 The book aims to revitalise the interdisciplinary debate about evolutionary ethics and substantiate the idea that evolution science can provide a rational and robust framework for understanding morality It also traces pathways for knowledge based choices to be made about directions for future long term biological evolution and cultural development in view of adaptation to the expected probable and possible future and the ecological sustainability of our planetary environment The authors discuss ethical challenges associated with the major biosocial sources of human variation individual variation inter personal variation inter group variation and inter generational variation This book approaches the long term challenges of the human species in a holistic way Researchers will find an extensive discussion of the key theoretical scientific aspects of the relationship between evolution and morality Policy makers will find information that can help them better understand from where we are coming and inspire them to make choices and take actions in a longer term perspective The general public will find food for thoughts The Age of Fitness Jürgen Martschukat, 2021-01-22 We live in the age of fitness Hundreds of thousands of people run marathons and millions go jogging

in local parks work out in gyms cycle swim or practice yoga The vast majority are not engaged in competitive sport and are not trying to win any medals They just want to get fit Why this modern preoccupation with fitness In this new book Jürgen Martschukat traces the roots of our modern preoccupation with fitness back to the birth of modern societies in the eighteenth century showing how the idea of fitness was interwoven with modernity's emphasis on perpetual optimization and renewal But it is only in the period since the 1970s he argues that the age of fitness truly emerged as part and parcel of our contemporary neoliberal era Neoliberalism enjoins individuals to work on themselves to cultivate themselves in body and mind Fitness becomes a guiding principle of social life an era defining network of discourses and practices that shape individuals actions and self conceptions The pursuit of fitness becomes a cultural repertoire that is deeply ingrained in our institutions and way of life This wide ranging book shows how deeply fitness is inscribed in modern societies and how important fitness has become to success or failure recognition or exclusion in a society that sets great store by self responsibility performance market and competition It will be of great value not only to those interested in sport and fitness but also to anyone concerned with the conditions of success and failure in our societies today
