Figuring It Out Colin Renfrew, 2003-03-25 Where do we come from What are we Where are we going These questions were posed by Paul Gauguin in a famous canvas painted in Tahiti that heralded the beginning of the modernist era But they are also the questions asked by modern prehistorians in their quest to reconstruct the human story In Figuring It Out Colin Renfrew investigates the profound convergence between the two disciplines drawing illuminating parallels between the way the modern artist seeks to understand the world by acting upon it and the way the archaeologist seeks to understand the world through the material traces of such actions What does the sapient paradox the fact that 30 000 years passed before anatomically modern humans began to change their world have to tell us about the unfolding of the history of our species Why do we now find Cycladic sculpture beautiful when merely a century ago such work would not have been thought suitable for display in an art museum And how is it that in the light of Marcel Duchamp s revolutionary gallery based gestures the prehistoric footsteps at Laetoli have been admitted as art too albeit of an involuntary kind Professor Renfrew uses these questions as a springboard for his examination of the history of the human condition a subject that can only be properly understood he argues through the idea of process of Homo sapiens active material engagement with their world Central to his exploration is a group of leading contemporary artists including Richard Long Mark Dion Antony Gormley Eduardo Paolozzi and David Mach whose works are notable for just such an engagement with their physical surroundings Figuring It Out takes sculpture off the plinth and archaeology out of the trench and situates the contemporary artist and archaeologist together at the center of an active endeavor to re evaluate what it is to be human

Prehistory Colin Renfrew, 2009-08-11 In Prehistory the award winning archaeologist and renowned scholar Colin Renfrew covers human existence before the advent of written records the overwhelming majority of our time here on earth and gives an incisive concise and lively survey

of the past and of how scholars and scientists labor to bring it to light Renfrew begins by looking at prehistory as a discipline detailing how breakthroughs such as radiocarbon dating and DNA analysis have helped us to define humankind's past how things have changed much more clearly than was possible just a half century ago As for why things have changed Renfrew pinpoints some of the issues and challenges past and present that confront the study of prehistory and its investigators Renfrew then offers a summary of human prehistory from early hominids to the rise of literate civilization that is refreshingly free of conventional wisdom and grand unified theories In this invaluable account Colin Renfrew delivers a meticulously researched and passionately argued chronicle about our life on earth and our ongoing quest to understand it *Before Civilization* Colin Renfrew,1990 The refinement of radiocarbon dating using the information from tree ring counts has raised serious doubts about the accepted theoretical framework of European pre history Records are being almost completely rewritten in the light of these new dates **Material Engagements** Neil Brodie,2004 The subject matter of archaeology is the engagement of human beings now and in the past with both the natural world and the material world they have created All aspects of human activity are potentially relevant to archaeological research and conversely the ways in which others especially artists and anthropologists have investigated the world are of interest to archaeologists Archaeological artefacts and sites are also used by groups and nations to establish identity and for financial gain both through tourism and trade in antiquities Colin Renfrew has actively engaged with art with politics and with the antiquities trade and has presented his ideas to broad audiences through accessible books and television programmes as well as championing the cause of archaeology in many public roles The papers in this volume which have been written by colleagues and former students on the occasion of his retirement relate to all of these subject areas and together give some idea of the complexity of the issues raised by critical engagements with the material world both past and present **The Emergence of Civilisation** Colin Renfrew,1972 Glozel Alice Gerard,2005 Alice Gerard has crossed the Atlantic a dozen times in the last ten years in her efforts to help solve the mystery of the controversial French site of Glozel which has been called the Dreyfus Affair of archaeology Accusations of fraud made by members of the archaeological establishment have contributed to the stormy history of the site during the last 80 years Glozel describes the exhaustive attempts Alice and her husband have made working with other researchers to understand the tombs the tablets covered with unknown writing the bones engraved with reindeer and the phallic idols found at the site In the process the Gerards made and lost good friends became informed about a number of esoteric subjects and finally developed a theory that might explain Glozel The story is not finished they hope the site will be recognized as authentic while Emile Fradin who discovered the first artifacts in 1924 is still alive

Archaeology: The Key Concepts Colin Renfrew,Paul Bahn,2013-09-05 An invaluable resource providing an up to date and comprehensive survey of the key terms used in this discipline today **Archaeology and Women** Sue Hamilton,Ruth D Whitehouse,Katherine I Wright,2016-09-16 Archaeology and Women draws together from a variety of angles work currently

being done within a contemporary framework on women in archaeology One section of this collection of original articles addresses the historical and contemporary roles of women in the discipline Another attempts to link contemporary archaeological theory and practice to work on women and gender in other fields Finally this volume presents a wide diversity of theoretical approaches and methods of study of women in the ancient world representing a cross section of work being carried out today under the broad banner of gender archaeology The geographical and chronological range of the contributions is also wide from Southeast Asia and South America to Western Asia Egypt and Europe from Great Britain to Greece and from 10 000 years ago to the recent past An ideal sampler for courses dealing with women and archaeology
