Crossing The Rubicon Crossing The Rubicon:

Crossing the Rubicon Luca Fezzi, 2020-01-07 A dramatic account of the fateful year leading to the ultimate crisis of the Roman Republic and the rise of Caesar's autocracy When the Senate ordered Julius Caesar conqueror of Gaul to disband his troops he instead marched his soldiers across the Rubicon River in violation of Roman law The Senate turned to its proconsul Pompey the Great for help But Pompey's response was unexpected he commanded magistrates and senators to abandon Rome a city that until then had always been defended The consequences were the ultimate crisis of the Roman Republic and the rise of Caesar's autocracy In this new history Luca Fezzi argues that Pompey's actions sealed the Republic's fate Drawing on a wide range of primary sources including Cicero's extensive letters Fezzi shows how Pompey's decision shocked the Roman people severely weakened the city and set in motion a chain of events that allowed Caesar to take power Seamlessly translated by Richard Dixon this book casts fresh light on the dramatic events of this crucial moment in ancient Roman history

Sentence Comprehension David J. Townsend, Thomas G. Bever, 2001 Using sentence comprehension as a case study for all of cognitive science David Townsend and Thomas Bever offer an integration of two major approaches the symbolic computational and the associative connectionist The symbolic computational approach emphasizes the formal manipulation of symbols that underlies creative aspects of language behavior The associative connectionist approach captures the intuition that most behaviors consist of accumulated habits The authors argue that the sentence is the natural level at which associative and symbolic information merge during comprehension The authors develop and support an analysis by synthesis model that integrates associative and symbolic information in sentence comprehension This integration resolves problems each approach faces when considered independently The authors review classic and contemporary symbolic and associative theories of sentence comprehension and show how recent developments in syntactic theory fit well with the integrated analysis by synthesis model They offer analytic experimental and neurological evidence for their model and discuss its implications for broader issues in cognitive science including the logical necessity of an integration of symbolic and connectionist approaches in the field

To Die of Not Writing Pablo Irizar, Donald Boyce, Martin Koci, 2025-08-12 This collection by academics from across the world celebrates the contributions of Emmanuel Falque a leading and influential voice in contemporary French phenomenology and beyond to the philosophy of religion Doing Philosophy of Religion with Emmanuel Falque wrestles with central philosophical and theological questions related to death trauma transformation revelation corporeality and dwelling while insisting on the essential connection between concept and action reflection and life

Napoleon and Berlin Michael V. Leggiere, 2002 Napoleon's unhealthy obsession with capturing Berlin is highlighted here for the first time with fascinating details of this frustrating and ultimately unsuccessful campaign Military History

Chains of Being Ross P. Cameron, 2022-03-10 In Chains of Being Ross P. Cameron argues for both Metaphysical Infitism the view that there can be infinitely descending chains of ontological dependence or grounding

with no bottom level of fundamental things or facts and Metaphysical Holism the view that there can be circles of ontological dependence or grounding Cameron argues against the widespread orthodoxy of Metaphysical Foundationalism that everything in reality is ultimately accounted for by a base class of fundamental phenomena In doing so he makes the case against another widespread orthodoxy that relations like grounding and ontological dependence are explanatory relations Cameron provides an alternative account of metaphysical explanation that does not tie explanation to determination relations like grounding and ontological dependence and he shows how explanation works in infinitist and holistic metaphysics Embracing the possibility of infinite regress and circularity can be theoretically fruitful as is shown by applying it to a number of cases across a wide range of philosophical areas including non well founded set theory mathematical structuralism the metaphysics of persons the metaphysics of gender and sexuality the semantic paradoxes and others In the course of exploring these applications Cameron defends distinctive views concerning when an infinite regress is vicious the nature of truth non classical logic and dialetheism social construction and more

Transforming the Theological Turn Martin Koci, Jason Alvis, 2020-10-14 Continental philosophers of religion have been engaging with theological issues concepts and questions for several decades blurring the borders between the domains of philosophy and theology Yet when Emmanuel Falque proclaims that both theologians and philosophers need not be afraid of crossing the Rubicon the point of no return between these often artificially separated disciplines he scandalised both camps Despite the scholarly reservations the theological turn in French phenomenology has decisively happened The challenge is now to interpret what this given fact of creative encounters between philosophy and theology means for these disciplines In this collection written by both theologians and philosophers the question Must we cross the Rubicon is central However rather than simply opposing or subscribing to Falque s position the individual chapters of this
