City Form And Everyday Life Torontos Gentrification And Critical Social Practice:

City Form and Everyday Life Jon Caulfield, 1994-01-01 Drawing on a series of in depth interviews among a segment of Toronto's inner city middle class population Caulfield argues that the seeds of gentrification have included patterns of critical social practice and that the gentrified landscape is highly paradoxical *The Gentrification and Inequality in Brooklyn* Judith DeSena, 2009-06-16 While most studies on gentrification focus almost exclusively on its causes and consequences through an examination of housing class conflict and the displacement of residents this book analyzes the process of gentrification *Gentrification and Inequality in Brooklyn* examines the ways in which the established working class and lower income residents of Greenpoint Brooklyn remain socially segregated from the incoming gentrifiers with both groups forming parallel cultures within the shared physical spaces of the community Desena broadens the typical analyses of gentrification to include the grass roots dynamics which create social class relations that lead to residential segregation created by social class relations Drawing upon areas traditionally under represented in urban sociology including families women children and local institutions other than housing this study explores the ways in which working class residents in the course of their everyday lives negotiate change in their neighborhood and dissimilarity with their new gentry neighbors *Gentrification and Inequality in Brooklyn* touches on issues familiar to anyone who has lived in a multi class or multi ethnic community while offering new perspectives on the ways that such communities develop and maintain the boundaries of social segregation

The Death and Life of the Urban Commonwealth Margaret Kohn, 2016-09-21 The city is a paradoxical space in theory belonging to everyone in practice inaccessible to people who cannot afford the high price of urban real estate Within these urban spaces are public and social goods including roads policing transit public education and culture all of which have been created through multiple hands and generations but that are effectively only for the use of those able to acquire private property Why should this be the case As Margaret Kohn argues when people lose access to the urban commons they are dispossessed of something to which they have a rightful claim the right to the city Political theory has much to say about individual rights equality and redistribution but it has largely ignored the city In response Kohn turns to a mostly forgotten political theory called solidarism to interpret the city as a form of common wealth In this view the city is a concentration of value created by past generations and current residents streets squares community centers schools and local churches Although the legal title to these mixed spaces includes a patchwork of corporate private and public ownership if we think of the spaces as the common wealth of many actors the creation of a new framework of value becomes possible Through its novel mix of political and urban theory *The Death and Life of the Urban Commonwealth* proposes a productive way to rethink struggles over gentrification public housing transit and public space *City Stages* Michael McKinnie, 2013-06-17 In every major city there exists a complex exchange between urban space and the institution of the theatre *City Stages* is an interdisciplinary and materialist analysis of this relationship as it has existed in Toronto since 1967 Locating theatre

companies their sites and practices in Toronto's urban environment Michael McKinnie focuses on the ways in which the theatre has adapted to changes in civic ideology environment and economy Over the past four decades theatre in Toronto has been increasingly implicated in the civic self fashioning of the city and preoccupied with the consequences of the changing urban political economy City Stages investigates a number of key questions that relate to this pattern How has theatre been used to justify certain forms of urban development in Toronto How have local real estate markets influenced the ways in which theatre companies acquire and use performance space How does the analysis of theatre as an urban phenomenon complicate Canadian theatre historiography McKinnie uses the St Lawrence Centre for the Arts and the Toronto Centre for the Performing Arts as case studies and considers theatrical companies such as Theatre Passe Muraille Toronto Workshop Productions Buddies in Bad Times and Necessary Angel in his analysis City Stages combines primary archival research with the scholarly literature emerging from both the humanities and social sciences The result is a comprehensive and empirical examination of the relationship between the theatrical arts and the urban spaces that house them

Metropolitan Democracies Bernard Jouve, 2019-06-04 Originally published in 2005 Citizen involvement and the concept of partnership in urban governance has long been a major issue in the transformation of local democracy The move from delegated to participative forms of local government has in principle profound consequences for governance at the scale of cities However it is clear that partnership and participation are interpreted in many different ways according to the traditions of government in different countries This volume brings together the experiences of three countries in which very different approaches to participation are evident Canada France and the United Kingdom By comparing and reflecting on these countries approaches and the resulting changes in governance it provides an in depth analysis of the intentions and effects of involving citizens in policy making It also highlights innovative new forms of partnership which are emerging within metropolitan areas at a local level

Suburb, Slum, Urban Village Carolyn Whitzman, 2010-01-02 A history of Toronto's Parkdale neighbourhood spanning three eras of suburban and urban development and examining the controversial planning practices that shaped it

Reclaiming Cities as Spaces of Middle Class Parenthood Johanna Lilius, 2018-09-12 For nearly a century families have been out migrating to suburbs and peri urban areas In this book Johanna Lilius conceptualizes the relatively recent phenomenon of families choosing to live in the inner city Drawing on a range of qualitative data the book offers a holistic approach to simultaneously understanding changes within parenting practices and changes connected to city development The book explains not only why families choose to stay in the inner city and how they use the city in their everyday lives but also how families change the landscape of contemporary cities and how the family is and has been perceived in urban planning and policy making The Nordic perspective provided by Lilius makes this book an important contribution in helping understand inner city change outside the Anglo American context and will appeal to an international audience

The Invention of Brownstone Brooklyn Suleiman Osman, 2012-11-29 An original and captivating history of gentrification this

book challenges the conventional wisdom that New York City began a comeback in the 1990s locating the roots of Brooklyn's revival in the social upheavals of the 1960s and 1970s Osman examines the emergence of a progressive coalition as young well educated brownstoners joined with poorer residents to battle city planners and local machine politicians Deftly mixing architectural cultural and political history this book offers an eye opening perspective on the post industrial city

Cities in Transition Nirmala Rao,2008-01-07 This is an up to date and topical treatment of how six major cities in Europe North America and Asia are coping with the new demands on urban government Population expansion the migration of new peoples and disparities between cities and suburbs are longstanding features of the urban crisis Today city governments also face demands for popular participation and better public services while they struggle to position themselves in the new world economy While each of the cities is located in its unique historical setting the emphasis of the book is upon the common dilemmas raised by major planning problems and the search for more suitable approaches to governance and citizen involvement A principal theme is the re engineering of institutional structures designed to foster local responsiveness and popular participation The discussion is set in the context of the globalizing forces that have impacted to different degrees at different times upon London Tokyo Toronto Berlin Hyderabad and Atlanta Cities in Transition is a major and original addition to the comparative literature on urban governance

Race, Class, and Gentrification in Brooklyn Jerome Krase,Judith N. DeSena,2016-05-12 In this book the authors revisit two iconic Brooklyn neighborhoods Crown Heights Prospect Lefferts Gardens and Greenpoint Williamsburg where they have been active scholars since the 1970s Krase and DeSena's comprehensive view from the street describes and analyses the neighborhoods decline and rise with a focus on race and social class They look closely at the strategies used to resist and promote neighborhood change and conclude with an analysis of the ways in which these neighborhoods contribute to current images and trends in Brooklyn This book contributes to a better understanding of the elevated status of Brooklyn as a global city and destination place
