Mohammad Gharipour,2021-05-06 Health and Architecture offers a uniquely global overview of the healthcare facility in the pre modern era engaging in a cross cultural analysis of the architectural response to medical developments and the formation of specialized hospitals as an independent building typology Whether constructed as part of Chinese palaces in the 15th century or the religious complexes in 16th century Ottoman Istanbul the healthcare facility throughout history is a built environment intended to promote healing and caring The essays in this volume address how the relationships between architectural forms associated with healthcare and other buildings in the pre modern era such as bathhouses almshouses schools and places of worship reflect changing attitudes towards healing They explore the impact of medical advances on the design of hospitals across various times and geographies and examine the historic construction processes and the stylistic connections between places of care and other building types and their development in urban context Deploying new methodological interdisciplinary and comparative approaches to the analysis of healthcare facilities Health and Architecture demonstrates how the spaces of healthcare themselves offer some of the most powerful and practical articulations of therapy

Matters of Engagement Daniela Hacke,Claudia Jarzebowski,Hannes Ziegler,2020-11-05 By drawing on a broad range of disciplinary and cross disciplinary expertise this study addresses the history of emotions in relation to cross cultural movement exchange contact and changing connections in the later medieval and early modern periods All essays in this volume focus on the performance and negotiation of identity in situations of cultural contact with particular emphasis on emotional practices They cover a wide range of thematic and disciplinary areas and are organized around the primary sources on which they are based The edited volume brings together two major areas in contemporary humanities the study of how emotions were understood expressed and performed in shaping premodern transcultural relations and the study of premodern cultural movements contacts exchanges and understandings as emotionally charged encounters In discussing these hitherto separated historiographies together this study sheds new light on the role of emotions within Europe and amongst non Europeans and Europeans between 1100 and 1800 The discussion of emotions in a wide range of sources including letters images material culture travel writing and literary accounts makes Matters of Engagement an invaluable source for both scholars and students concerned with the history of premodern emotions Cities and Solidarities Justin Colson,Arie van Steensel,2017-01-06 Cities and Solidarities charts the ways in which the study of individuals and places can revitalise our understanding of urban communities as dynamic interconnections of solidarities in medieval and early modern Europe This volume sheds new light on the socio economic conditions the formal and informal institutions and the strategies of individual town dwellers that explain the similarities and differences in the organisation and functioning of urban communities in pre modern Europe It considers how communities within cities and towns are constructed and reconstructed how interactions amongst members of differing groups created social and economic institutions and how urban communities reflected a sense of social cohesion In answering these questions the contributions combine theoretical frameworks with new

digital methodologies in order to provoke further discussion into the fundamental nature of urban society in this key period of change The essays in this collection demonstrate the complexities of urban societies in pre modern Europe and will make fascinating reading for students and scholars of medieval and early modern urban history

Guilds, Labour and the Urban Body Politic Bert De Munck, 2017-12-01 This book presents a new view on the relation between labour and community through a focus on craft guilds In the Southern Netherlands occupational guilds were both powerful and governed by manufacturing masters enabling the latter to imprint their mark upon urban society in an economic socio cultural and political way While the urban community was deeply indebted to a corporative spirit and guild ethic originating in medieval Germanic and Christian traditions guild based artisans succeeded in being accepted as genuine political and hence rational actors their political identity and agency being based upon their skills and trustworthiness In the long run this corporative spirit and power inexorably waned Yet this book shows that an adequate understanding of the development of European modernity i e proletarianisation and the emergence of a modern economy and modern economic and political thinking requires taking seriously the ruins upon which it is build These histories can actually be recounted as purifications of sorts in which the economic was separated from the political the individual from the social and the transcendent from the material While the religiously inspired corporative nature of the urban body politic waned the urban artisans lost their credibility as political and rational actors

City and Society in the Low Countries, 1100-1600 Bruno Blondé, Marc Boone, Anne-Laure Van Bruaene, 2018-10-04 The Low Countries was collectively one of the earliest and most heavily urbanised societies in European history Present day Belgium and the Netherlands still share important common features such as comparatively low income inequalities high levels of per capita income a balanced political structure and a strong civil society This book traces the origins of this specific social model in medieval patterns of urbanisation while also searching for explanations for the historical reproduction of social inequalities Access to cheap inland river navigation and to the sea generated a river delta urbanisation that explains the persistence of a decentralised urban economic network marked by intensive cooperation and competition and by the absence of real metropolises Internally as well powerful checks and balances prevented money and power from being concentrated Ultimately however the utmost defining characteristic of the Low Countries urban cultures was located in their resilient middle classes

Difference explore different kinds of communities and have difference as their primary theme difference between the poor and the unfree between power as wielded by rulers or the clergy between the western Mediterranean region and the rest of Europe and between a supposedly great king and lesser ones
