Catholic Mediations in Southern Europe Xavier Itçaina, 2018-11-13 Investigating the role played by religious actors in sociopolitical issues as a manifestation of the invisible politics of religion this book concentrates on the social economy support to migrants the fight against social exclusion and pacifist campaigns where religious actors have played discreet but structuring roles In the European context politico religious matters have been reduced in two ways first a reduction of identity with religion being transformed into a heritage in the form of a minimal sense of belonging and second the media focus on the most fundamentalist currents within all religions This book responds by proposing an alternative perspective with a focus on Southern European Catholicism and a comparison between Italian Spanish and French subnational territories In a period of polarized relations between religion and politics there is a Catholic action repertoire which avoids this binary confrontation and which in contrast is characterized by its mediating dimension The Catholic mediation repertoire receives little publicity and is expressed in a discreet but structuring way to address different public problems An important contribution to the literature this book will interest scholars and upper level students working on religion and politics mediation and peace studies local policy making and comparative approaches to Southern European society and politics

The Routledge International Handbook of Life and Values Education in Asia John Chi-Kin Lee, Kerry J Kennedy, 2024-06-28 This Handbook provides a comprehensive look at the educational scope of life and values that characterize 21st century Asia as well as those values shared across cultures Some values are deeply resonant with the region's past while others reflect modernity and the new contexts in which Asian societies find themselves Exploring these values of different types and the way they are constructed in Eastern and Western contexts the contributors delve into the diversity of religious moral and social education to promote greater understanding across cultures While a range of values is identified here there is no single set of values that can be applied to all people in all contexts The time has long gone even for single societies when values can be imposed Yet this Handbook emphasizes both the extent and importance of values to individuals and their societies how they respond to these values may provide the key to better and more caring societies and to better lives for all Academics and teachers will find this Handbook resourceful because it raises important theoretical issues related to social values and their formation in distinctive contexts and provides novel insights into the diverse educational landscape in Asia Policymakers and educators will also find this text helpful in learning to think about new ways to improve the quality of people's lives
