It's also about having the proper cash flow to meet expenses when they arise. There are many places where money is spent and many opportunities for costs to get out of control. Cost control in construction is the difference between making a profit and absorbing a loss. In many cases, this guide breaks down what cost control is and how to improve your own processes. Cost control in construction is the process by which managers keep expenses under control by managing labor, material and overhead costs to ensure that the project finishes on budget. Cost control relies on sound estimates and constant monitoring over the course of a project. Without cost control, a project quickly burns through its budget and leaves the construction firm with very little profit or even a loss. As a result, good cost control is a must for any construction business that wants to be successful. Practical Adjudication for Construction Professionals Leslie J. Edwards, Richard N. M. Anderson, 2002 Introduction Part 1 Legislation and formal adjudication procedures The Construction Act ICE Adjudication Procedure JCT Adjudication Procedure GC Works Adjudication Procedure CIC Model Adjudication Procedure The Scheme Draft Proposed Possible Scheme Amendments Part 2 The conduct of an adjudication Adjudicator appointments Jurisdiction Procedural fairness Conduct of the adjudication The Decision Part 3 Supplementary matters Miscellaneous issues Appeals and enforcement Insurance implications Conclusions Appendices Bibliography
