

Custom pet position:

Normal profile routine sets the pet position to approximately 6 inches above the ground. The pet opening height may be changed to open anywhere between 6" and 30" above the ground. To change the automatic pet opening height refer to the following procedure:

- Begin with the door in the closed position.
- Disconnect door, using emergency disconnect, and manually move door to the desired pet opening height (between 6" and 30" above the ground). Reconnect door.

Alternately you can move the door with the opener up/down command and stop where you want the pet open height (6" to 30" above the ground).
- Move the slide switch on the wall station from UNLOCK to LOCK. Opener will sound two beeps. Move the slide switch back to UNLOCK. The opener will sound one beep. The UNLOCK-to-LOCK-to-UNLOCK sequence must be done within a 3 second time span. The pet button is now programmed to automatically open the door to this custom height. Pressing the Pet button should return the door to the closed position.

NOTE: The Opener will NOT accept programmed pet lock position if door is below 6" or higher than 30".

NOTE: Activation of the normal profile routine will reset the pet position to the default 6" height. For use of the Pet Button see Operation section.

Multi-Door Programming:

Momentarily pressing the button programmed in the Transmitter Programming Step activates the door. Other buttons can also be programmed to activate different doors, for multi-door installations. Each button or a combination of two buttons pressed simultaneously can be programmed to activate a different door. Only one button at a time can be programmed to activate a specific Opener.

Custom Upper Limits

Refer to Step 27 in the Installation section to set a custom upper limit.
