Corporate Ties That Bind Martin J. Walker,2017-03-28 In the 21st century corporations have worked their way into government and as they become increasingly more powerful arguments about their involvement with public health have become increasingly black and white With corporations at the center of public health and environmental issues everything chemical or technological is good everything natural is bad scientists who are funded by corporations are right and those who are independent are invariably wrong There is diminishing common ground between the two opposed sides in these arguments Corporate Ties that Bind is a collection of essays written by influential academic scholars activists and epidemiologists from around the world that scrutinize the corporate reasoning false science and trickery involving those like in house epidemiologists who mediate the scientific message of organizations who attack and censure independent voices This book addresses how the growth of corporatism is destroying liberal democracy and personal choice Whether addressing asbestos radiation PCBs or vaccine regulation the essays here address the dangers of trusting corporations and uncover the lengths to which corporations put profits before health

Materials for a Healthy, Ecological and Sustainable Built Environment Emina K. Petrović,Brenda Vale,Maibritt Pedersen Zari,2017-03-23 Principles for Evaluating Building Materials in Sustainable Construction Healthy and Sustainable Materials for the Built Environment provides a comprehensive overview of the issues associated with the selection of materials for sustainable construction proposing a holistic and integrated approach The book evaluates the issues involved in choosing materials from an ecosystem services perspective from the design stage to the impact of materials on the health of building users The three main sections of the book discuss building materials in relation to ecosystem services the implications of materials choice at the design stage and the impact of materials on building users

and their health The final section focuses on specific case studies that illustrate the richness of solutions that existed before the rise of contemporary construction and that are consistent with a sustainable approach to creating built environments These are followed by modern examples which apply some if not all of the principles discussed in the first three sections of the book Provides a holistic and integrated approach to the issues associated with the selection of materials for sustainable construction Provides a thorough understanding of ecosystem services based on ecology research for built environment design Provides an original review of the impact of materials on human health Provides case studies to illustrate the points above
