

Finally we release the V3 version of the THV system in Forex Factory.
29th January, 2009

Something good (the V2 version) is difficult but not impossible to improve

This is the result of a teamwork, with 5 traders we formed a THV development work blog where we were able to discuss all about possible issues and progress of the new V3 version.

My special thanks to Tim and Zen for their unconditional work modifying the indicators to my requirements, Dobiece (our technical director) , Tradewell, GoforPips and Special Ed for forward testing and revising this document.

The result is a clean and functional chart with rules that allow relative secure trades and early entries.

I experienced a hit rate of about 70 to 80% of winning trades; this result depends on the trading skills of every trader.

The THV team tested this system only on 1M and 5M time frame but it should work as well in higher TF's but we don't have experience on that trading style.

THV is not a click and forget system, neither a holy grail. Like any other system, it requires good Forex skills and basic knowledge of FX techniques together with a good MM.

For newbie's we recommend to visit www.babypips.com, an excellent source of basic knowledge.

I claim the copyrights of the modification of the indicators and the system in its totality.
Don't copy this system without my written permission.

This is freeware and I will make use of international laws if I see this system selling in Ebay or elsewhere. We spent endless hours, days and weeks on fining this system and give it away for free personal use, it is dirty to copy and sell the idea and work from someone else.

This is the only reason why I don't post the V3 MQ4 files, too many people copy.
