A Perfect Moral Storm Stephen M. Gardiner, 2011-02-01 Climate change is arguably the great problem confronting humanity but we have done little to head off this looming catastrophe In *The Perfect Moral Storm* philosopher Stephen Gardiner illuminates our dangerous inaction by placing the environmental crisis in an entirely new light considering it as an ethical failure Gardiner clarifies the moral situation identifying the temptations or storms that make us vulnerable to a certain kind of corruption First the world s most affluent nations are tempted to pass on the cost of

climate change to the poorer and weaker citizens of the world Second the present generation is tempted to pass the problem on to future generations Third our poor grasp of science international justice and the human relationship to nature helps to facilitate inaction As a result we are engaging in willful self deception when the lives of future generations the world s poor and even the basic fabric of life on the planet is at stake We should wake up to this profound ethical failure Gardiner concludes and demand more of our institutions our leaders and ourselves This is a radical book both in the sense that it faces extremes and in the sense that it goes to the roots Notre Dame Philosophical Reviews The book s strength lies in Gardiner s success at understanding and clarifying the types of moral issues that climate change raises which is an important first step toward solutions Science Magazine Gardiner has expertly explored some very instinctual and vitally important considerations which cannot realistically be ignored Required reading Green Prophet Gardiner makes a strong case for highlighting and insisting on the ethical dimensions of the climate problem and his warnings about buck passing and the dangerous appeal of moral corruptions hit home Times Higher Education Stephen Gardiner takes to a new level our understanding of the moral dimensions of climate change A Perfect Moral Storm argues convincingly that climate change is the greatest moral challenge our species has ever faced and that the problem goes even deeper than we think Peter Singer Princeton University

Brown, Kathryn Gwiazdon, Laura Westra, 2023-09-27 The Routledge Handbook of Applied Climate Change Ethics is a powerful reference source for the identification and exploration of the underlying ethical issues in climate change law and policy Bridging theory with practice it takes ethical engagement out of the classroom and into the halls of governance The Handbook's 39 chapters written by a diverse and inter disciplinary team of experts from around the world are case studies divided into five parts Parts I IV highlight the ethical issues that arise in climate change policy formation from duties not to harm to duties to consider the views and voices of those who will be or are being harmed from the role of human rights justice and democracy to how to identify and respond to disinformation and denialism It also raises the ethics of various policy responses such as cap and trade carbon taxing and geo engineering Part V offers a way forward with strategies on how to expressly consider ethics in climate change policy formation from negotiations to education media communication and the power and potential of shaming The volume is essential reading for students professors and practitioners who wish to better engage with government and non government organizations on climate policy to better understand the practical application of the theory and philosophy of ethics and how to more strongly draft and defend ethical action in negotiating drafting and defending climate change law and policy **The Climate Crisis and Other Animals** Richard Twine, 2024-03-01 The Climate Crisis and Other Animals is a must read for anyone who cares about the future of our planet and the animals who live on it Twine examines the impact of the climate crisis on nonhuman animals and argues for the importance of a climate and food justice movement inclusive of nonhuman animals The book examines the ways in which climate breakdown is affecting nonhuman animal species and delves deeply into the politicised controversy over the extent of

emissions from animal agriculture demonstrating the markedly lower emissions of eating vegan. Critical of misguided human-centred framings of the climate crisis, Twine makes clear the necessity of including practices of animal commodification, the importance of documenting the effect of a changing climate on other animal species, and the mitigative opportunities of a radical remaking of dominant human-animal relations. *The Climate Crisis and Other Animals* addresses the emissions impacts of radical land use changes and the twentieth-century scaling up of animal commodification within the animal industrial complex, revealing how this system is interwoven in the gendered and racialised histories of capitalism. Twine collates an impressive body of scientific research that demonstrates both the already enormous impact of the climate crisis on the lives of nonhuman animals and the need to tackle the dominance of meat-based cultures. Twine critically explores approaches to food transition and three potentially transformative scenarios for global food systems that could help dismantle the animal industrial complex and create a more sustainable and just food system. Averting the climate and biodiversity crises requires nothing less than a radical transformation in how we see ourselves in relation to other species. [Ethics and climate change](#), 2015-07-27. Climate change is the most significant moral and environmental issue of our time. This project seeks to help deepen explicit ethical reflection around the world on national responses to climate change by developing a publicly available record on national compliance with ethical obligations for climate change, similar to the reports that are now available on national compliance with human rights obligations. [Human Dignity, Human Rights, and Social Justice](#). Zhibin Xie, Pauline Kollontai, Sebastian Kim, 2020-06-25. This book explores human dignity, human rights, and social justice based on a Chinese interdisciplinary dialogue and global perspectives. In the Chinese and other global contexts, today social justice has been a significant topic among many disciplines, and we believe it is an appropriate topic for philosophers, theologians, legal scholars, and social scientists to sit together, discuss, enrich each other, and then deepen our understanding of the topic. Many of them are concerned with the conjuncture between social justice, human rights, and human dignity. The questions this volume asks are: what is the place of human rights in social justice? How is human dignity important in the discourse on human rights? And through these inquiries, we ask further: how is possible to achieve humanist justice? This volume presents the significance, challenges, and constraints of human dignity in human rights and social justice, and addresses the questions through philosophical, theological, sociological, political, and legal perspectives, and these are placed in dialogue between the Chinese and other global settings. We are concerned with the norms regarding human dignity, human rights, and social justice while we take seriously into account their practice. This volume consists of two main sections. The first section examines Chinese perspectives on human rights and social justice, in which both from Confucianism and Christianity are considered, and the issues such as patriotism, religious freedom, petition, social protest, the rights of marginalized people, and sexual violence are studied. The second section presents the perspectives of Christian public theologians in the global contexts. They examine the influence of Christian thought and practice in the issues of human rights and social justice descriptively and prescriptively.

and address issues such as religious laws and rights diaconia majoritarianism general equality social economic disparities and climate justice from global perspectives including in the contexts of America Australia Israel and Europe With contributions by experts from mainland China Hong Kong South Korea Australia New Zealand the UK USA and Norway the book provides valuable cross cultural and interdisciplinary insights and perspectives As such it will appeal to political and religious leaders and practitioners particularly those working in socially engaged religious and civil organizations in various geopolitical contexts including the Korean Peninsula and Japan
