Godzimirski,2016-02-25 This edited collection focuses on the impact of the changing global distribution of power on the EU s energy policy and ability to project its approach to energy related issues abroad It maps the EU s changing position on global energy the impact of various factors on its energy policy and its relations with Russia China the USA and Brazil

Global Energy Justice Benjamin K. Sovacool,Michael H. Dworkin,2014-09-29 We need new ways of thinking about and approaching the world s energy problems Global energy security and access is one of the central justice issues of our time with profound implications for happiness welfare freedom equity and due process This book combines up to date data on global energy security and climate change with fresh perspectives on the meaning of justice in social decision making Benjamin K Sovacool and Michael H Dworkin address how justice theory can help people to make more meaningful decisions about the production delivery use and effects of energy Exploring energy dilemmas in real life situations they link recent events to eight global energy injustices and employ philosophy and ethics to make sense of justice as a tool in the decision making process They go on to provide remedies and policies that planners and individuals can utilize to create a more equitable and just energy future

Global Energy Markets The Emirates Center for Strategic Studies and Research,2012-07-12 The impact of the changing global strategic landscape on energy markets is being felt across the world and is the subject of ongoing debate within industry and governments alike These changes not only affect the evolution of oil markets and their influence on production rates and pricing but also a host of other factors including energy security the effects of global economic crises and the growing market presence of Arabian Gulf producers both in terms of their conventional reserves and their development of alternative and renewable sources The ECSSR 17th Annual Energy Conference Global Energy Markets Changes in the Strategic Landscape held at the Center on November 1 2 2011 and the papers compiled in this volume as a result provide a variety of informed views on these trends and their consequences for both producers and consumers in the Middle East and elsewhere The effects of geostrategic developments on energy markets and the formulation of energy policies in the GCC states and abroad are explored in detail as are the economic viability and outlook of renewable energy sources both in light of CO2 emissions constraints and the involvement of Gulf hydrocarbon producers in the development of renewables The potential benefits and risks of nuclear energy production are explored as is public sentiment toward nuclear development worldwide particularly following recent events in Japan the repercussions of which continue to be felt both in politics and industry The ongoing effects of the global economic crisis are also discussed particularly with reference to their

consequences for energy markets worldwide **Energy Security and Green Energy** Angelica Rutherford, 2020-04-16 This book shows how the links between energy security and national and international law and policies on green energy pose challenges to a transition towards a green energy system Based on empirical work carried out in two very different country case studies Great Britain and Brazil this book attempts to foster a better understanding of the role played by energy security in constructing and deconstructing green energy policy initiatives The broad range of views raised in national contexts leads to legal disputes in international forums when attempts are made to address the issues of this energy security green energy interplay As such building on the findings of the case studies this book then analyses the interplay between energy security and green energy development in international trade law as encapsulated in the law of the World Trade Organisation WTO Finally the author proposes a way forward in creating the legal space in the law of the WTO for trade restrictive measures aimed at ensuring green energy security **Want, Waste or War?** Philip Andrews-Speed, Raimund Bleischwitz, Tim Boersma, Corey Johnson, Geoffrey Kemp, Stacy D. VanDeveer, 2014-11-13 In addition to environmental change the structure and trends of global politics and the economy are also changing as more countries join the ranks of the world's largest economies with their resource intensive patterns The nexus approach conceptualized as attention to resource connections and their governance ramifications calls attention to the sustainability of contemporary consumer resource use lifestyles and supply chains This book sets out an analytical framework for understanding these nexus issues and the related governance challenges and opportunities It sheds light on the resource nexus in three realms markets interstate relations and local human security These three realms are the organizing principle of three chapters before the analysis turns to crosscutting case studies including shale gas migration lifestyle changes and resource efficiency nitrogen fertilizer and food systems water and the Nile Basin climate change and security and defense spending The key issues revolve around competition and conflict over finite natural resources The authors highlight opportunities to improve both the understanding of nexus challenges and their governance They critically discuss a global governance approach versus polycentric and multilevel approaches and the lack of those dimensions in many theories of international relations **EU Energy Geopolitics** Filippos Proedrou, 2025-01-30 The global energy transition will be a game changer for global politics The field of energy geopolitics hence is changing fast providing challenges opportunities and variable outcomes for states across the world The academic scholarship on the geopolitics of renewables has expanded exponentially over the last decade focusing on winners vs losers conflict vs cooperation and establishing initial expectations and general propositions regarding the outcomes of the global energy transition Cases studies however have been far and few and appear in book chapters or more rarely journal articles Overall there is a dearth of academic monographs examining in depth how specific actors in the global system approach new energy geopolitics how they are impacted by the global energy transition and how this links with their grand strategy This short monograph aims to fill this gap by offering an up to date case study of EU energy geopolitics Grounded upon the sub

field of energy geopolitics it produces a conceptual framework linking the global energy transition with EU grand strategy to assess how it impacts EU's position in the global system as well as the strategic gains trade offs and risks implicated. The book takes as its starting point and reviews systematically the main assumptions of the geopolitics of the global energy transition literature and the EU energy and climate policy that drives and shapes the EU energy transition. It subsequently focuses its attention on the impact of the EU energy transition on EU energy security economic competitiveness and foreign policy power position and the potential it generates for more conflict or cooperation. The discussion is anchored in the different forms of power the EU operationalizes and showcases the strengths limits and antinomies of the EU power toolbox in EU energy geopolitics. The originality significance and contribution of this monograph lies in the cross fertilization of fossil divestment and clean energy geopolitics energy and climate policy energy transition and EU as a power scholarship with an eye to provide a comprehensive up to date account of new EU energy geopolitics. In all this monograph dissects the prospects and geopolitical implications of the new energy geopolitics and the foreign policy ramifications engendered by the global energy transition. This book is aimed at academics and students in the areas of International Relations International Political Economy European Studies Geopolitics and Energy Politics. It aspires moreover to become a reference point for the scholarship in the field of energy geopolitics. Moreover it will be of value to think tanks and policy makers working in the fields of foreign energy and climate policy.

New Security Frontiers Sai Felicia Krishna-Hensel, 2016-04-29

The globalizing world is increasingly confronting a new category of security issues related to resource availability. The resource environment contains both traditional categories such as energy foodstuffs and water as well as new technologically related resources such as rare earth minerals. The essays in this volume emphasize both the uniqueness and the magnitude of these new challenges while simultaneously acknowledging that cooperation and competition in response to these security concerns occur within the context of both the historical and contemporary international power configurations. Moreover these challenges are of a global nature and will require global perspectives global thinking and innovative global solutions. Krishna Hensel brings together a wide range of topics focusing on critical resource availability impacting upon global security and the geopolitical ramifications of resource competition. The volume addresses the development of strategic thinking on these issues and underscores the increasing awareness that this is a critical area of concern in the twenty first century global landscape.
