Die Diagnostische Situation Die Diagnostische Situation:

Dynamik Psychischer Prozesse in Diagnose und Therapie Wolfgang Sbringer, Zoltan Vass, , *A Study of Somatic Conditions in Manic-depressive Psychosis* Torsten Sonden, 1927 **Kompetenzmodellierung des diagnostischen Urteils von Grundschullehrern** Karina Karst, 2012 Den diagnostischen Kompetenzen von Lehrern wird von bildungswissenschaftlicher wie auch von bildungspolitischer Seite eine hohe Bedeutung für eine positive Lernentwicklung der Schüler zugeschrieben Eine gezielte Auseinandersetzung mit dem theoretischen Konstrukt Diagnostische Kompetenz im Sinne einer Kompetenzmodellierung ist bisher in der Forschungslandschaft jedoch offen Unter Berücksichtigung bedeutsamer Vorarbeiten vorangegangener Forschungsarbeiten zielt diese Studie auf eine solche präzise und intensive Analyse Hierin sind drei Teilziele integriert Erstens Die Formulierung eines theoretischen Strukturmodells Dies geschieht durch den Einbezug diagnostischer Unterrichtssituationen und drei Arten diagnostischen Wissens der Lehrer Es resultieren zehn empirisch identifizierbare situationsspezifische diagnostische Teilkompetenzen Zweitens Die Auswahl eines psychometrischen Modells mit dem das theoretische Modell abgebildet werden kann Hier wird dabei auf die Varianzkomponentenanalyse der Generalisierbarkeitstheorie rekurriert Die so berechneten Varianzkomponenten können sodann als Kennwerte diagnostischer Kompetenzen interpretiert werden Und drittens Die Entwicklung eines modellbasierten Messverfahrens Das so konstruierte Kompetenzmodell bietet einen Ausgangspunkt für zukünftige Forschung Es kann herangezogen werden um neue und differenzierte Erkenntnisse über diagnostische Kompetenzen von Lehrern zu erwerben und deren prädictive Kraft für den schulischen Lernerfolg bei Schülern zu gewinnen Die Datenbasis entstammt dem Projekt Persönlichkeits und Lernentwicklung von Grundschulkindern PERLE **Personnel Selection and Assessment** Heinz Schuler, James L. Farr, Mike Smith, 2013-03-07 The impetus for this volume came from the editors belief that most current research and thinking about personnel selection and assessment in organizations considered only the perspective of the employer The job applicant seeking to join the organization or the employee being considered for promotion or reassignment was typically given little attention from the designers of employment or assessment systems They believed that this imbalance had several negative implications 1 Organizational selection and assessment appeared to be the principal area within work and organizational psychology that had forgotten a basic tenet of the profession of psychology namely that the welfare of the individual is paramount 2 A lack of concern for the individuals who were being assessed could result in additional criticisms of psychological assessment in employment settings 3 The acceptability of selection and assessment devices and systems may impact in largely unknown ways on the decisions of individuals to apply for jobs or transfers thus affecting the selection ratio and potential utility of such systems 4 Individual reactions to the characteristics of assessment and selection devices could affect the accuracy of the information obtained about those individuals adversely affecting the reliability and validity of resulting personnel decisions Informally discussing these concerns with their professional

colleagues the editors found that others were similarly troubled Their next response was to organize a three day conference bringing together a number of researchers in applied psychology to present papers and participate in discussions related to balancing individual and organizational needs in selection and assessment Revisions of the papers presented at this conference form the core of this volume **Pneumocystis-carinii-Pneumonie bei Immunsuppression** H.
