Chronic Pain Loss And Suffering A Clinical Perspective:

Chronic Pain, Loss and Suffering Ranjan Roy, 2004-01-01 Loss and grief are an inherent part of chronic illness But while much has been written on grief associated with death and dying the grief and losses accompanying chronic illness have received relatively little scholarly attention In **Chronic Pain Loss and Suffering** Ranjan Roy a leading expert on chronic pain addresses the complex issues related to loss among those with chronic illness For many patients with chronic intractable pain disorders the course of their illness is unpredictable and varied Many seeming losses are transient and can be redeemed over time for instance through retraining and physical therapy but are still serious and pose a challenge to the common understanding of the grief process Clinical understanding of grief is undergoing a revolution From its Freudian roots it is shifting more and more to a social psychological perspective The phase task orientation of grief has come under serious scrutiny and this book demonstrates some of the problems inherent in that conceptualization in its application to the chronically ill The author attempts to combine the current state of knowledge through an examination of contemporary literature and clinical application He presents a series of comprehensive case studies which together indicate that the key challenge for many patients is loss of self esteem and control The chapters deal with a range of losses such as job loss declining ability to function loss of family and sexual roles old age and its related losses and suicide Through discussion of the trials and tribulations and successes that chronically ill patients encounter in their journey this work will assist clinicians in helping patients come to terms with their new reality and establish a renewed sense of self **Clinical Pain**

Reading Literature and Chronic Pain Josie Billington, 2025-05-15 This valuable and insightful study into chronic pain and its treatment advances a striking analysis of the complex phenomenon of chronic pain also attesting to the importance of the medical humanities in addressing urgent questions that medical science alone cannot resolve The primary purpose of this book is twofold First to demonstrate empirically against a conceptual background drawn from multiple disciplines and knowledge bases historical medical neurobiological psychological socio anthropological how an apparently soft intervention such as literary reading can effectively combat symptoms of a condition as intractable as chronic pain Second to explore what this evidence tells us about pain as a lived experience as well as a condition in urgent need of new treatment options and about literature and the reading of fiction and poetry as therapeutic influences in contemporary health and healthcare most particularly in alleviating the often severe mental health difficulties with which chronic pain is almost universally associated Based on unique empirical research with people who are living with chronic pain this book is the first of its kind to demonstrate the value of literature and literary reading both as a discourse for understanding and finding pain and as an intervention in its treatment **Canadian Books in Print.
