The Oxford Colour Dictionary Angus Stevenson, Julia Elliott, Richard Jones, 2001 This colour dictionary is in a portable and durable format and is an all purpose volume although it is particularly suitable for schoolchildren especially pre GCSE and Standard Grade level in the 11-14 age group The emphasis is therefore on clarity and accessibility both in terms of layout and content The bold design with all headwords inflections derivatives and phrases in colour makes it very easy to find the information you need while definitions are written in clear and simple English avoiding technical vocabulary Local Colour Vladimir Kapor, 2009 Local colour is an undertheorized notion Although the expression itself is nowadays used in everyday speech in both French and English its domestication only further highlights the need for a clarifying study of this concept which has come to be crucial in aesthetic debates From the seventeenth century rift between Poussinistes and Rubenistes to the genesis of Romanticist aesthetic theories in early nineteenth century France to the North American regionalist prose of the Local colour movement from Roger de Piles to Benjamin Constant Victor Hugo Prosper Mérimée and Hamlin Garland this book sets out to map for the first time couleur locale's three hundred year journey across centuries languages and genres In addition to proposing a genealogy of the concept and the paths of its semantic evolution it also initiates a reflection on the factors that could have prompted the mobility of the term across cultures art forms and their metalanguages Visibilities and Invisibilities of Race and Racism Yasuko Takezawa, Faye V. Harrison, Akio Tanabe, 2025-01-28 Takezawa Harrison Tanabe and their contributors present a multi-sited transnational and intercultural perspective on racism shifting its emphasis away from the conventional North Atlantic interpretive frameworks to better understand its fundamental nature Racism is not a uniquely transatlantic phenomenon but because it is most often understood within Euro American paradigms its salience in other contexts is often less visible The chapters in this volume analyze the process by which fundamentally invisible differences have been made visible and various groups and communities have been marked essentialized and substantialized under a range of social political and cultural conditions Focusing on the space between the visible and invisible they evaluate the dynamics by which invisible differences are rendered visible and by which visible differences render other differences invisible In doing so they promote a decentering of Western centered frameworks and elucidate continuities with and discontinuities from past era of racial antagonism and conflict They look at case studies ranging from Japan India and Southeast Asia to Iceland the United States and intra white racism in Europe The strength of this work lies in its exploration of the varied modalities of race and racism particularly those that deviate from the conventional visibly identifiable notions of race thus broadening the understanding of racism beyond traditional paradigms An important contribution to the re worlding

of the study of racism for scholars researchers and students of anthropology sociology ethnic studies and intercultural studies *New Directions in Colour Studies* Carole P. Biggam, Carole A. Hough, Christian J. Kay, David R. Simmons, 2011-10-20 Colour studies attracts an increasingly wide range of scholars from across the academic world Contributions to the present volume offer a broad perspective on the field ranging from studies of individual languages through papers on art architecture and heraldry to psychological examinations of aspects of colour categorization perception and preference The chapters have been developed from papers and posters presented at a conference on Progress in Colour Studies PICS08 held at the University of Glasgow The volume both updates research reported at the earlier PICS04 conference published by Benjamins in 2006 as Progress in Colour Studies volumes 1 and 2 and introduces new and exciting topics and developments in colour research In order to make the articles maximally accessible to a multidisciplinary readership each of the six sections following the initial theoretical papers begins with a short preface describing and drawing together the themes of the chapters within that section There are seventeen colour illustrations
