Germes and Steel Jared Diamond marshals evidence from five continents and across 13 000 years of human history in an attempt to answer the question of why that history unfolded so differently in various parts of the globe His results offer new explanations for why the unequal divisions of power and wealth so familiar to us today came into existence and have persisted Balancing materials drawn from a vast range of sources addressing core problems that have fascinated historians anthropologists biologists and geographers alike and blending his analysis to create a compelling narrative that became an international best seller and reached a broad general market required a mastery of the critical thinking skill of reasoning that few other scholars can rival Diamond s reasoning skills allow him to persuade his readers of the value of his interdisciplinary approach and produce well structured arguments that keep them turning pages even as he refocuses his analysis from one disparate example to another Diamond adds to that a spectacular ability to grasp the meaning of the available evidence produced by scholars in those widely different disciplines making Guns Germs and Steel equally valuable as an exercise in high level interpretation

An Analysis of Jared M. Diamond's Collapse Rodolfo Maggio,2017-07-05 American scholar Jared Diamond deploys his powers of interpretation to great effect in Collapse How Societies Choose to Fail or Succeed which seeks to understand the meaning behind the available evidence describing societies that have survived and those that have withered and died Why for example did the Norsemen of Scandinavia who colonized Greenland in the early tenth century not survive while the inhabitants of Highland New Guinea did With the evidence to hand Diamond notes that a society s collapse tends to be preceded by a severe reduction in population and considerable decreases in political economic and social complexity Delving even deeper Diamond isolates five major factors determine the success or failure of human societies in all periods of history environmental degradation which occurs when an ecosystem deteriorates as its resources are exhausted climate change natural or man made hostile neighbors weakened trading partners and access or otherwise to the resources that enable the society to adapt its challenges The breadth of Diamond s research provides the springboard from which to reach these definitions but it inevitably also introduces complications how can evidence produced by specialists in so many different disciplines be compared Diamond s ability to understand the meaning of the evidence at hand and his readiness to seek and supply clarifications of meaning where necessary underpin his achievement and comprise a textbook example of how

interpretative skills can provide a framework for strong critical thinking
