creciente interés por los estudios ecológicos de los fenómenos lingüísticos este volumen presta especial atención a la influencia de los contextos culturales históricos sociales y políticos Spanish in Colombia and New York City Rafael

Orozco, 2018-03-15 This volume fills a void in language variation and change research It is the first to provide an empirical comparative study of Spanish in Colombia and New York City Remarkable similarities in the linguistic conditioning on language variation in both communities contrast with interesting differences in the effects of social predictors The book provides a window into the effects of language and dialect contact on change and serves as a model for studies comparing diasporic populations to their home speech communities *Spanish Word Formation and Lexical Creation* José Luis

Cifuentes Honrubia, José Luis Cifuentes, Susana Rodríguez Rosique, 2011 This volume contributes a wider approach to word formation processes and sheds light on some unsolved issues While the formal relationships established between the different constituents of a complex word have been analyzed in great depth the semantic links have received little dedication In order to complete the analysis it is necessary to pay attention to the semantic properties associated to verbalization The main purpose of the book is to integrate both the semantic proposals and the formal perspectives concerning word formation This theoretical aim becomes the framework to study several mechanisms of lexical creation and neologisms Furthermore word formation is presented as a new source for Applied Linguistics Although the volume uses Spanish as a starting point it means to delimit formation patterns which may also be productive in other languages This book is sure to become an important reference in the controversial field of word formation **Grammaticalization, Synchronic Variation, and**

Language Contact Rena Torres Cacoullos, 2000-08-15 This study of Old Spanish and present day Mexico and New Mexico data develops a grammaticization account of variation in progressive constructions Diachronic changes in cooccurrence patterns show that grammaticization involves reductive change driven by frequency increases Formal reduction results in the emergence of auxiliary plus gerund sequences as fused units Semantically the constructions originate as spatial expressions their grammaticization involves gradual loss of locative features of meaning Semantic generalization among parallel evolutionary paths results in the competition among different constructions in the domain of progressive aspect Patterns of synchronic variation follow from both the retention of meaning differences and the routinization of frequent collocations as well as sociolinguistic factors Register considerations turn out to be crucial in evaluating the effects of language contact Purported changes in Spanish English bilingual varieties are largely a feature of oral informal language rather than a manifestation of convergence
