Data Mining Mobile Devices Jesus Mena, 2013-06-18 With today's consumers spending more time on their mobiles than on their PCs new methods of empirical stochastic modeling have emerged that can provide marketers with detailed information about the products content and services their customers desire Data Mining Mobile Devices defines the collection of machine sensed environmental data pertaining to human social behavior It explains how the integration of data mining and machine learning can enable the modeling of conversation context proximity sensing and geospatial location throughout large communities of mobile users Examines the construction and leveraging of mobile sites Describes how to use mobile apps to gather key data about consumers behavior and preferences Discusses mobile mobs which can be differentiated as distinct marketplaces including Apple Google Facebook Amazon and Twitter Provides detailed coverage of mobile analytics via clustering text and classification AI software and techniques Mobile devices serve as detailed diaries of a person continuously and intimately broadcasting where how when and what products services and content your consumers desire The future is mobile data mining starts and stops in consumers pockets Describing how to analyze Wi Fi and GPS data from websites and apps the book explains how to model mined data through the use of artificial intelligence software It also discusses the monetization of mobile devices desires and preferences that can lead to the triangulated marketing of content products or services to billions of consumers in a relevant anonymous and personal manner **Pocket Data Mining**

Mohamed Medhat Gaber, Frederic Stahl, João Bártolo Gomes, 2013-10-19 Owing to continuous advances in the computational power of handheld devices like smartphones and tablet computers it has become possible to perform Big Data operations including modern data mining processes onboard these small devices A decade of research has proved the feasibility of what has been termed as Mobile Data Mining with a focus on one mobile device running data mining processes However it is not before 2010 until the authors of this book initiated the Pocket Data Mining PDM project exploiting the seamless communication among handheld devices performing data analysis tasks that were infeasible until recently PDM is the process of collaboratively extracting knowledge from distributed data streams in a mobile computing environment This book provides the reader with an in depth treatment on this emerging area of research Details of techniques used and thorough experimental studies are given More importantly and exclusive to this book the authors provide detailed practical guide on the deployment of PDM in the mobile environment An important extension to the basic implementation of PDM dealing with concept drift is also reported In the era of Big Data potential applications of paramount importance offered by PDM in a variety of domains including security business and telemedicine are discussed **Mobile Data Mining** Yuan Yao, Xing

Su, Hanghang Tong, 2018 This SpringerBrief presents a typical life cycle of mobile data mining applications including data capturing and processing which determines what data to collect how to collect these data and how to reduce the noise in the data based on smartphone sensors feature engineering which extracts and selects features to serve as the input of algorithms

based on the collected and processed data model and algorithm design In particular this brief concentrates on the model and algorithm design aspect and explains three challenging requirements of mobile data mining applications energy saving personalization and real time Energy saving is a fundamental requirement of mobile applications due to the limited battery capacity of smartphones The authors explore the existing practices in the methodology level e g by designing hierarchical models for saving energy Another fundamental requirement of mobile applications is personalization Most of the existing methods tend to train generic models for all users but the authors provide existing personalized treatments for mobile applications as the behaviors may differ greatly from one user to another in many mobile applications The third requirement is real time That is the mobile application should return responses in a real time manner meanwhile balancing effectiveness and efficiency
