Data Science Fondamentaux Machine Learning:

Data Science : fondamentaux et études de cas Michel Lutz, Eric Biernat, 2015-10-15 Nous vivons une époque très excitante qui ramène l'analyse de données et les méthodes quantitatives au cœur de la société. L'aboutissement de nombreux projets de recherche, la puissance de calcul informatique disponible et des données profuses permettent aujourd'hui d'incroyables réalisations grâce au travail des data scientists. Un livre de référence pour les data scientists. La data science est l'art de traduire des problèmes industriels, sociaux, scientifiques ou de toute autre nature en problèmes de modélisation quantitative pouvant être résolus par des algorithmes de traitement de données. Cela passe par une réflexion structurée devant faire en sorte que se rencontrent problèmes humains, outils techniques informatiques et méthodes statistiques algorithmiques. Chaque projet de data science est une petite aventure qui nécessite de partir d'un problème opérationnel souvent flou, une réponse formelle et précise qui aura des conséquences réelles sur le quotidien d'un nombre plus ou moins important de personnes. Eric Biernat et Michel Lutz proposent de vous guider dans cette aventure. Ils vous feront visiter les vastes espaces de la data science moderne de plus en plus présente dans notre société et qui fait tant parler d'elle parfois par l'intermédiaire d'un sujet qui lui est corollaire : les big data. Des études de cas pour devenir kaggle master. Loin des grands discours abstraits, les auteurs vous feront découvrir, à la main, les pratiques de leur métier de data scientist chez OCTO Technology, l'un des leaders français du domaine. Et vous mettrez galement la main à la pâte avec juste ce qu'il faut de théorie pour comprendre ce qu'impliquent les méthodes mathématiques utilisées, mais surtout avec votre ordinateur personnel, quelques logiciels gratuits et puissants, ainsi qu'un peu de réflexion, vous allez participer activement à cette passionnante exploration qui s'adresse à cet ouvrage. Aux développeurs, statisticiens, étudiants et chefs de projets ayant résolu des problèmes de data science. Aux data scientists, mais aussi toute personne curieuse d'avoir une vue d'ensemble de l'état de l'art du machine learning.
