

What is Payroll Accounting?

The accounting for payroll involves all aspects of calculating and paying compensation to employees, including the payment of withholdings to third parties. The outcome of this process is documentation of the expenses associated with all types of compensation, as well as timely payments to employees.

Payroll Process Flow

Though some systems that incorporate more or less automation may not include all of these steps, the following process flow will apply to most payroll systems.

Step 1. Set Up New Employees

Have new employees fill out payroll-specific information as part of the hiring process, such as the W-4 form and medical insurance forms that may require payroll deductions. Set aside copies of this information in order to include it in the next payroll.

Step 2. Collect Timecard Information

Salaried employees require no change in wages paid for each payroll, but you must collect and summarize information about the hours worked by non-exempt employees. This may involve having employees scan a badge through a computerized time clock.

Step 3. Verify Timecard Information

Summarize the payroll information just collected and have supervisors verify that employees have correctly recorded their time.

Step 4. Summarize Wages Due

Multiply the number of hours worked by the pay rate for each employee, also factoring in any overtime or shift differentials.

Step 5. Enter Employee Changes

Employees may ask to have changes made to their paychecks, usually to the taxes or pension amounts withheld. You may need to record much of this prior to calculating taxes, since it impacts the amount of wages to which taxes are applied.
