

Installation Instructions

Antenna

This Receiver is designed to operate on either the SKYWAY or ROADWAY antenna. It is shipped in position to operate on the ROADWAY antenna. When the SKYWAY antenna is used, a connection to the antenna coil **MUST** be changed. See full directions on the inside of the top set cover, and the antenna instructions.

Receiver

To install the Receiver, first remove the blank panels on each side of the speaker grille in the center of the instrument panel. Also remove the two buttons below the grille.

To prepare the Receiver for installation pry off the push button cover and install push buttons. Replace cover, but do not replace the station call letter holder.

Assemble the mounting bracket to the dash as shown in Figure 2.

A hole for the Receiver mounting bolt is provided in the dash but the insulation will have to be drilled at this point. This $\frac{1}{2}$ " hole is located on the engine side of the dash just above the welded flange to the left of the center line when viewed from the engine side of the dash.

For all cars except Dodge, four spacers should be applied to the front of the Receiver. The two large ones are slipped over the control shafts, the two smaller ones are screwed to the two studs on the face of the Receiver. (See Fig. 2). Use the correct spacers for the individual car. A kit for each type car will be found in the radio package.
