Climate Change and Soil Microbial Control of Carbon Sequestration Yang Yang, Anna Gunina, Peng Shi, Yan Xing Dou, 2025-06-09 As a major regulator of the dynamics of soil organic carbon SOC and nutrient availability soil microorganisms partake in a variety of biochemical reactions Soil microorganisms exert two primary contradictory impacts on controlling soil carbon dynamics firstly they enhance carbon release into the atmosphere via the catabolic activity secondly they prevent release through stabilizing SOC in a form that resists decomposition Because of the large soil carbon pool even small changes in the balance between inputs and outputs from the soil carbon pool can exert a significant impact on atmospheric CO₂ levels Over the past few decades the influence of climate change such as the increased CO₂ levels rising temperature sudden heat or drought stress and extreme weather events on soil carbon cycling have been intensively analyzed The focus on investigating the global carbon cycle due to its connection to climate change has led to an increasing number of studies on microbial control of SOC It has been extensively recognized that the extent of the soil SOC reservoir is determined by microbial involvement since soil carbon dynamics ultimately stem from microbial activity and growth However the mechanisms by which these microbe regulated processes cause soil carbon stabilization under climate change is still unclear This Research Topic of Frontiers in Environmental Science Soil Processes focuses on climate change and its impact on soil microbial control carbon sequestration Brief Research Report Correction Data Report Editorial Hypothesis 2 Recent advancements in soil carbon dynamics under the influence of global climate change 3 Biogeochemical mechanisms connecting soil microbes and SOC 4 The role of soil microbes in the SOC conversion process 5 The new high throughput sequencing for soil microbes including metagenome transcriptomics metabonomics methods etc 6 Response of soil microbes to climate change and their impacts on SOC transformation and fixation 7 Addressing uncertainty in estimating SOC pool at the local regional and global scales *Wallace's Farmer*, 2014
