Micklitz, Thomas Wilhelmsson, 2016-04-22 The Unfair Commercial Practices Directive is the most important directive in the field of trade practices to have emerged from the EC but it builds upon European activity which has sought to regulate trade practices on both a sectoral and horizontal level It is an umbrella provision which uses general clauses to protect consumers How effective this approach is and how it relates the existing *acquis* are fundamental issues for debate This work provides a critical appraisal of the Unfair Commercial Practices Directive linking discussion of it to general debates about how fair trading should be regulated It explains how the Directive fits into the existing *acquis* It also examines national traditions where these are necessary to explain the European approach as in the case of general clauses The book will be a valuable tool for any student of consumer law seeking to understand the thinking behind the directive and how it will affect national laws It will also influence policy makers by suggesting how the directive should be interpreted and what policy lies behind its formulation Businesses and their advisers will use the book as a means of understanding the new regulatory climate post the directive **Cyber Consumer Law and Unfair Trading Practices** Cristina Coteanu, 2017-03-02 Of great interest to practitioners policymakers and academics as well as to consumers and traders in general this timely work addresses all important legal and practical issues that arise in connection with online trading This important work outlines the existing legislation and legal jurisprudence in the EU and the US and exposes the potential for unfair commercial practices to arise from online contracts electronic agents disclosure of information online advertising and online dispute resolution in cross border transactions The continuing prevalence of unfair commercial practices will ensure this book remains in great demand Consumer redress for misleading and aggressive practices Great Britain: Law Commission, 2011-04-12 The Consumer Protection from Unfair Trading Regulations 2008 the Regulations prohibit misleading and aggressive trade practices The Regulations implemented a European directive replacing 23 previous UK consumer protection measures including most of the Trade Descriptions Act 1968 They are enforced mainly by the Office of Fair Trading and by trading standards services Under current law consumers do not have a right to compensation if a trader breaches the Regulations Instead consumers must rely on a variety of private causes of action some statutory some based on case law These are complex confusing and patchy This Consultation Paper aims to 1 simplify redress for misleading

commercial practices 2 simplify redress for aggressive commercial practices and 3 fill gaps in protection where a consumer is unable to gain redress for serious breaches of the Regulations

Consumer Law and Policy Iain Ramsay, 2012-10-25 This new edition continues to provide a critical introduction to the legal regulation of consumer markets situating it within the context of broader debates about rationales for regulation the role of the state and the growth of neo liberalism It draws on interdisciplinary sources assessing for example the increased influence of behavioural economics on consumer law It analyses the Europeanisation of consumer law and the tensions between neo liberalism and the social market consumer protection and consumer choice in the establishment of the single market ground rules The book also assesses national regional and international responses to the world financial crisis as reflected in the regulation of consumer credit markets This edition incorporates recent legislative and judicial developments of the law blending substantial extracts from primary UK EU and international legal materials

Access to Justice in Transnational B2C E-Commerce Sutatip Yuthayotin, 2014-11-17 This book identifies institutional mechanisms that can be used to promote consumer confidence in direct online sales with businesses B2C e commerce It argues that enhancing the access to justice in a multidimensional sense can potentially offer an effective means of boosting consumer confidence It introduces a conceptual framework for a multidimensional approach to access to justice in the context of consumer protection describing the various reasonable criteria needed to satisfy consumer demands in B2C e commerce The framework which reflects all essential aspects of consumers expectations when they engage in online transactions provides a benchmark for the evaluation of various consumer protection mechanisms Based on an analysis of different mechanisms and using the framework's criteria the

practice of private ordering which does not rely on the creation of rules of law but rather on the use of technology as a solution appears to offer a meaningful way to enhance access to justice in B2C e commerce However though private ordering holds considerable potential certain weaknesses still need to be eliminated This book demonstrates how private ordering can be successfully implemented with the help of an intermediary a neutral third party that plays an integral part in the collaborative task of facilitating various aspects of private ordering thus helping to limit the risks of failure and ensuring a fairer market setting In order to move forward it argues that the state with its wealth of material resources and incentive options is the institution best suited to acting as an intermediary in facilitating private ordering This promising proposal can improve consumer protection which will in turn boost consumer confidence
