However, it should be noted that the model is only a simplified representation of the real world and its results should be interpreted with caution. The model is based on a number of assumptions, such as the homogeneity of the population and the accuracy of the data, which may not always be valid. Therefore, the results of the model should be used as a guide rather than a definitive answer.

The Humanities Pandemic Margaret Topping, 2023-07-25 This book explores how the Humanities can play an essential services role in addressing global challenges such as the Covid pandemic In arguing for their contribution alongside that of the Health Sciences it calls for a new critical engagement honest and self reflective from Humanities scholars with the question of how to overcome a fundamental challenge facing universities globally finding a common language and set of cultural assumptions between disciplines as the basis for communication The book looks at the nature of the challenges that can beset collaboration across disciplines and indeed across sectors notably between researchers and the general public and argues for a new Translational Humanities in both the sense of an applied Humanities and a Humanities that can translate itself across disciplines and sectors Crucially too it suggests that it is not narratives such as a pandemic novel or contagion film that successfully engage with contentious debates about the challenges of Covid but rather critically distant texts and thematic contexts that typically place the self in the position of other like travel narratives This book sits at a previously unconsidered intersection between debates around interdisciplinary collaboration and communication theories of intercultural contact and encounter and the role of the Humanities in tackling global issues
