## **Contemporary Military Innovation:**

*Contemporary Military Innovation* Dima Adamsky, Kjell Inge Bjerga, 2012-05-23 This book explores contemporary military innovation with a particular focus on the balance between anticipation and adaption. The volume examines contemporary military thought and the doctrine that evolved around the thesis of a transformation in the character of war. Known as the Information Technology Revolution in Military Affairs (IT RMA), this innovation served as an intellectual foundation for the US defence transformation from the 1990s onwards. Since the mid 1990s, professional ideas generated within the American defence milieu have been further disseminated to military communities across the globe with huge impact on the conduct of warfare. With chapters written by leading scholars in this field, this work sheds light on RMAs in general and the IT RMA in the US in particular. The authors analyse how military practice and doctrines were developed on the basis of the IT RMA ideas, how they were disseminated, and the implications of them in several countries and conflicts around the world. This book will be of much interest to students of strategic studies, defence studies, war and technology, and security studies in general.

**Contemporary Military Innovation** Dima Adamsky, Kjell Inge Bjerga, *Winning the Next War* Stephen Peter Rosen, 2018-07-05 How and when do military innovations take place? Do they proceed differently during times of peace and times of war? In *Winning the Next War*, Stephen Peter Rosen argues that armies and navies are not forever doomed to fight the last war. Rather, they are able to respond to shifts in the international strategic situation. He also discusses the changing relationship between the civilian innovator and the military bureaucrat. In peacetime, Rosen finds innovation has been the product of analysis and the politics of military promotion in a process that has slowly but successfully built military capabilities critical to American military success. In wartime, by contrast, innovation has been constrained by the fog of war and the urgency of combat needs. Rosen draws his principal evidence from US military policy between 1905 and 1960, though he also discusses the British army's experience with the battle tank during World War I.

**Culture and Strategic Studies** Alastair Finlan,2013-09-02 This book explores and compares the contemporary military cultures of the United States and the United Kingdom The last decade has witnessed astonishing global events from 9 11 and military operations in Afghanistan in the same year to the military intervention in Libya in 2011 Western military forces have been involved in all of these campaigns and have been engaged in continuous military operations for over ten years It is therefore now apt to focus a spotlight on the military cultures of these state based armed forces This book examines how contemporary American and British military culture is formed focusing explicitly on the six major military institutions The author dedicates a chapter to each of these institutions with each one sharing a unifying analytical framework These chapters explore the formation and sustenance of US UK military culture under the rubric of common themes that include social origins transformative events leaders approaches to war technology and contemporary identity To conclude the book considers the impact of the War on Terror on the military cultures of the US and UK as well as likely directions for the future This book will be of much interest to students of military studies strategic studies security studies and comparative politics

*Explaining Contemporary Asian Military Modernization* Sheryn Lee,2021-04-20 This book proposes a novel theoretical framework of interactive arming in order to explain armament dynamics in contemporary Asia Frequently the modernisation of contemporary naval forces in Asia is described as an arms race with the underlying assumption being that weapons acquisitions and increases in defence expenditure are competitive and bilateral and due to conflicting purposes or mutual fears This book argues that the concept of an arms race is an unsuitable one for explaining contemporary military modernisation in 21st century Asia Instead it proposes a novel and innovative concept of interactive arming and argues that what drives conflict is political rivalry not weapons acquisitions Instead of perceiving arming as abnormal behaviour the book views arming as a natural strategic behaviour of states and military modernisation as a basic requirement for a state s ability to survive This book will be of much interest to students of Asian security strategic studies and international relations in general

**Contemporary Military Theory** Jan Angstrom,J.J. Widen,2014-07-17 The book aims to provide the reader with a state of the art introduction to classic and modern military theory The text accounts for the most important theories within the field by developing and analyzing these theories as well as problematizing both their normative and explanatory aims While focusing on military theory the book does not only reflect a single way of relating to knowledge of war and warfare but furthers learning by introducing contrasting perspectives as well as constantly criticizing the theories There is a clear need for an introductory text for the entire field of military theory that focuses whole heartedly on the theories not on their context or how they are expressed in practice during war This book covers such questions as how we should understand the changing character of war the utility of force and how the pursuit of political ends is achieved through military means It draws upon and illustrates military thought through a wide ranging number of examples from the Napoleonic Wars to the current war in Afghanistan This book will be of great interest for students of military theory strategic studies security studies

and defence studies      **Technological Change and the Future of Warfare** Michael E. O'Hanlon, 2011-04-01 In light of the spectacular performance of American high technology weapons in the 1991 Persian Gulf War as well as the phenomenal pace of innovation in the modern computer industry many defense analysts have posited that we are on the threshold of a revolution in military affairs RMA The issue has more than semantic importance Many RMA proponents have begun to argue for major changes in Pentagon budgetary priorities and even in American foreign policy more generally to free up resources to pursue a transformed U S military and to make sure that other countries do not take advantage of the purported RMA before we do This book takes a more measured perspective Beginning with a survey of various types of defense technologies it argues that while important developments are indeed under way most impressively in electronics and computer systems the overall thrust of contemporary military innovation is probably not of a revolutionary magnitude Some reorientation of U S defense dollars is appropriate largely to improve homeland defense and to take advantage of the promise of modern electronics systems and precision guided munitions But radical shifts in U S security policy and Pentagon budget priorities appear unwarranted especially if those shifts would come at the expense of American military engagement in overseas defense missions from Korea to Iraq to Bosnia      Military Innovation in Türkiye Barış Ateş, 2023-01-31 This book explores Turkish military innovation since the Cold War The major questions addressed are how Türkiye has been able to innovate the production of new weapon systems its philosophical background how the country overcame bureaucratic and economic obstacles and how these innovations resonated in military doctrine and organization Focusing on two main defense industry projects that trigger an overall change in the military doctrine and organization the text examines the innovative inclinations of the Turkish military realm and reveals the societal economic and political consequences of military innovation This book fills a gap in the literature by providing an interdisciplinary and comprehensive overview of Turkish military innovation Contributors include those involved in and affected by the military innovation process as well as scholars who monitor the process using primary sources Military Innovation in Türkiye will appeal to academics politicians and military professionals interested in understanding the evolution of the Turkish military      Contemporary European Security David J. Galbreath, Jocelyn Mawdsley, Laura Chappell, 2019-03-20 Contemporary European Security explores the complex European security architecture and introduces students to the empirical theoretical and conceptual approaches to studying the subject Written by experts in each subfield it addresses key topics within the wider strategic context of international security Presenting traditional and critical debates to illuminate this ever changing field it addresses specifically European security since 2000 and the end of the Cold War The evolution of International Relations theories in understanding security in Europe The role of NATO in the post war period and its strategy impact and enlargement The institutionalisation of the CSCE and the political tensions within the OSCE The EU's Common Security and Defence Policy and recent policy initiatives in defence Feminist conceptions of European security European military innovation Security challenges in the post Soviet space and the

growing instability in the Middle East and North Africa The emergence of human security Internal and societal security This essential textbook will be of key interests to students and scholars of European Security Security and Military studies Strategic Studies European Politics and International Relations
