Canonical Morphology And Syntax Oxford Linguistics:

Canonical Morphology and Syntax Dunstan Brown, Marina Chumakina, Greville G. Corbett, 2013 This is the first book to present Canonical Typology a framework for comparing constructions and categories across languages The canonical method takes the criteria used to define particular categories or phenomena eg negation finiteness possession to create a multidimensional space in which language specific instances can be placed In this way the issue of fit becomes a matter of greater or lesser proximity to a canonical ideal Drawing on the expertise of world class scholars in the field the book addresses the issue of cross linguistic comparability illustrates the range of areas from morphosyntactic features to reported speech to which linguists are currently applying this methodology and explores to what degree the approach succeeds in discovering the elusive canon of linguistic phenomena

The Oxford Handbook of Morphological Theory Jenny Audring, Francesca Masini, 2019 This volume is the first handbook devoted entirely to the multitude of frameworks adopted in the field of morphology It offers critical discussions of the main theoretical issues in word formation and inflection a detailed guide to each morphological theory and explorations into the relationship between morphological theory and other fields

The Oxford Handbook of Inflection Matthew Baerman, 2015-07-30 This is the latest addition to a group of handbooks covering the field of morphology alongside The Oxford Handbook of Case 2008 The Oxford Handbook of Compounding 2009 and The Oxford Handbook of Derivational Morphology 2014 It provides a comprehensive state of the art overview of work on inflection the expression of grammatical information through changes in word forms The volume's 24 chapters are written by experts in the field from a variety of theoretical backgrounds with examples drawn from a wide range of languages The first part of the handbook covers the fundamental building blocks of inflectional form and content morphemes features and means of exponence Part 2 focuses on what is arguably the most characteristic property of inflectional systems paradigmatic structure and the non trivial nature of the mapping between function and form The third part deals with change and variation over time and the fourth part covers computational issues from a theoretical and practical standpoint Part 5 addresses psycholinguistic questions relating to language acquisition and neurocognitive disorders The final part is devoted to sketches of individual inflectional systems illustrating a range of typological possibilities across a genetically diverse set of languages from Africa Asia and the Pacific Australia Europe and South America

Morphological Perspectives Baerman Matthew Baerman, 2019-04-17 In a field still dominated by syntactic perspectives it is easy to overlook the words that are the irreducible building blocks of language Morphological Perspectives takes words as the starting point for any questions about linguistic structure their form their internal structure their paradigmatic extensions and their role in expressing and manipulating syntactic configurations With a team of authors that run the typological gamut of languages this book examines these questions from multiple perspectives both the canonical and the non canonical By taking these questions seriously and letting loose a full battery of analytical techniques the following chapters not only celebrate the pioneering work of Greville G

Corbett but present new thinking on traditional approaches including the paradigm deponency and morphological features

Compounds and Compounding Laurie Bauer, 2017-10-12 This controversial new book addresses the linguistic problems around compounds words which sit on the borderline of syntax and morphology *A Grammar of Gan Chinese* Xuping

Li, 2018-02-19 China is very rich in language resources and Mandarin is undoubtedly its most prestigious and well known representative Unfortunately most of these languages remain understudied or even unstudied Such is the case of Yichun Gan Written in the style of a reference grammar this book sets out to give a comprehensive and systematic description of Yichun grammar with the aim of increasing readers knowledge about Chinese languages other than Mandarin In addition to common categories like nouns verbs adjectives and prepositions the volume attempts to cover as many grammatical categories and constructions as possible including the Sinitic specific categories such as classifiers the aspect system postpositions and the object marking BA constructions To highlight its uniqueness the book adopts a comparative perspective to contrast many features of Yichun Gan with Mandarin and other Sinitic languages Our study shows that Yichun Gan possesses both Northern and Southern Chinese traits in many constructions which supports its status as a transitional language It will be of interest to linguists who wish to learn more about East Asian languages and more specifically Sinitic languages **The Dynamics of**

Nominal Classification Ruth Singer, 2016-02-22 The use of grammatical gender in the Australian language Mawng calls into question prevailing ideas about the functions of nominal classification systems Mawng s gender system has a strong semantic basis and plays an important role in the construction of meaning in discourse Gender agreement in verbs is frequently lexicalized creating idioms called lexicalised agreement verbs that are structurally similar to noun verb idioms This book will be of interest to anyone interested in nominal classification or cross linguistic approaches to idioms

Aspects of Linguistic Variation Daniël Olmen, Tanja Mortelmans, Frank Brisard, 2018-12-03 Linguistic variation is a topic of ongoing interest to the field Its description and its explanations continue to intrigue scholars from many different backgrounds By taking a deliberately broad perspective on the matter covering not only crosslinguistic and diachronic but also intralinguistic and interspeaker variation and examining phenomena ranging from negation over connectives to definite articles in well and lesser known languages the volume furthers our understanding of variation in general The papers offer new insights into among other things the theoretical notion of comparative concepts the social or mental nature of language structure the areal factor in lexical typology and the diachronic implications of semantic maps The collection will thus be of relevance to typologists and historical linguists as well as to people studying variation within the areas of cognitive and functional linguistics **Grammaticalization Scenarios from Europe and Asia** Walter Bisang, Andrej

Malchukov, 2020-09-21 This volume intends to fill the gap in the grammaticalization studies setting as its goal the systematic description of grammaticalization processes in genealogically and structurally diverse languages To address the problem of the limitations of the secondary sources for grammaticalization studies the editors rely on sketches of grammaticalization

phenomena from experts in individual languages guided by a typological questionnaire **Reflexive constructions in the world's languages** Katarzyna Janic, Nicoletta Puddu, Martin Haspelmath ,2023-07-11 This landmark publication brings together 28 papers on reflexive constructions in languages from all continents representing very diverse language types While reflexive constructions have been discussed in the past from a variety of angles this is the first edited volume of its kind All the chapters are based on original data and they are broadly comparable through a common terminological framework The volume opens with two introductory chapters by the editors that set the stage and lay out the main comparative concepts and it concludes with a chapter presenting generalizations on the basis of the studies of individual languages
