Wikipedia contributors, Runways & Racers Terry O'Neil,2011 Runways and Racers focuses on sports car races held at military installations throughout America in the early 1950s It was a marriage of convenience for the Sports Car Club of America and the Strategic Air Command with both parties gaining advantages from the arrangement The thorn in the side turned out to be a Congressman whose own aspirations exceeded his standing but who found himself in a position to be able to influence the outcome of events *Autocar* ,2005 **Amédée Gordini** Roy P. Smith,2022 This is the story of a man a team and their life and times as well as a complete record of all their achievements and failures It logs the financial and personal cost of racing in the prewar and postwar periods It tells of how the mighty car company Renault became involved with them in the late 1950s and how Amedee Gordini became known throughout the world as one of the greatest engine tuners of his time Ford Cars 1945 to 1995 David Rowe, Ford cars can be found all over the world and vintage models appear at most classic car shows This book helps to identify the models sold by Ford of Britain and provides detailed information on each model with technical specifications original colour photographs and lists the colour schemes that were available Continuing this popular series covering classic British cars David Rowe now turns his keen eye to the British Ford models He is well placed to do so having worked at two Ford dealerships over a 30 year period and has driven many of the models covered by this book Green Australia Steve Lancaster,2012 Green Australia A snapshot examines the ways in which Australians are attempting to reduce their ecological footprint both at home and at work In 2009 the CO2 Energy Emissions Index found that Australia had overtaken the USA to become the largest per capita emitter of greenhouse gases in the world a legacy of dependence on coal fired power stations the widespread adoption of conventional farming techniques heavy reliance on vehicles powered by fossil fuel dirty industrial practices and a growing mountain of waste Yet in recent years there has been a growing awareness that climate change is beginning to bite the recent drought and devastating floods suggesting that more extreme weather patterns are likely unless significant steps are taken to combat global warming Using case studies and up to date research this book demonstrates that although much more needs to be done if Australia is to secure a carbon neutral future some Green shoots are beginning to emerge Automotive Engineering International ,2007
The Times Index ,2007 Indexes the Times and its supplements **Automotive News** ,2007
