Cctv Second Edition Networking And Digital Technology:

Cctv: Networking and Digital Technology Vlado Damjanovski, 2005-04 Closed circuit television CCTV is experiencing a leap in technology using digital techniques networking and the Internet The new edition of this high level professional reference retains the particulars that made the first edition a success including the details of CCD cameras lenses coaxial cables fiber optics and system design but it is expanded to cover all video compression techniques used in the ever increasing assortment of digital video recorders DVRs available on the market today This new edition of the book CCTV demystifies DVR technology It also serves to clarify the technology of data networking The theoretical section explains the various compression techniques Networking is also a new and unknown area for many CCTV installers and this is explained in a brand new section New edition more accessible with reduced price

Metafolklore Alexander V. Avakov, 2012-12 The book is organized in Folklore Units Each Folklore Unit has Context and may have one or more Metacontexts with citations of works of great philosophers or writers hence the title of the book is Metafolklore The book covers the life of immigrants from the USSR in the U S remembers life in Russia and gradually concentrates on the modus operandi of the KGB FBI CIA NYPD NSA ECHELON Foreign Intelligence Surveillance Court AI and ISI It covers frontiers of legal theory of surveillance What distinguishes this book is the intensely personal account of the events and issues

Plato's Dreams Realized Aleksandr Vladimirovich Avakov, 2006 Arrested in the Soviet Union in 1975 for composing and distributing subversive pamphlets compiled of quotes from official Soviet sources Alexander V Avakov was sentenced to hard labor in a KGB camp After serving his sentence he emigrated to the United States with his family in 1981 Avakov soon found himself subject to the shadowy invasion of FBI surveillance for no apparent reason was it for the letters he wrote to friends back home In his book Avakov examines the evolution of electronic surveillance as well as the extent of modern total surveillance with a consideration of the impact of electronic surveillance on citizen rights and the philosophical basis for the connection between rights and privacy Without privacy there is no autonomy of person without autonomy of person there is no freedom Yet the United States government employs several legal mechanisms which hinge on innovative uses of electronic surveillance to evade the safeguards that are the pride of America Such techniques include the use of friendly countries intelligence services and the Echelon program to avoid the ticklish problem of obtaining warrants With the war on terror and new legislation such as the USA Patriot Act the US government has been expanding the use of searches without warrants such as wiretaps and other forms of surveillance to gather information that technically is supposed to be barred from presentation in criminal court as evidence The resultant weakening of the exclusionary rule and due process in general violate the Constitution and make a mockery of the freedoms America advertises to the rest of the world America he shows declares high minded legal ideals but has consistently cheated in their implementation There is logic tradition and a stable modus operandi in the way the US security apparatus violates the Constitution The history of political spying in the US as well as warnings by US legal

authorities point to the dangers of electronic surveillance to human rights The author outlines various ways in which surveillance of citizens is increasing then examines the bases of our expectations of liberty from Plato to the US Constitution In the tradition of the Russian intelligentsia he brings a broad knowledge of literature philosophy history and legal studies to his analysis Avakov concludes with a discussion of practical solutions to counter these dangers as suggested in a number of publications
