By the Bedside of the Patient Nortin M. Hadler, M.D., 2016-01-11 In *By the Bedside of the Patient* Nortin Hadler places current efforts to reform medical education from the undergraduate level through residency programs and on to continuing medical education in historical context In doing so he traces the evolution of medical school curricula residency and fellowship programs and the clinical practices they promoted Hadler examines crucial junctures in history to locate the seeds for reform Some believe that medical education and training should highlight literature ethics and culture while others emphasize science and efficiency to abbreviate the time from entry to licensure Neither of these approaches Hadler argues maintains or improves patient care which should be at the core of medical education and practice Hadler contends that most reform attempted thus far constitutes at best little more than a reshuffling of the basic curriculum and at worst an augmenting of medicine's predilection to measure grade and record Examining generational changes in medical education Hadler mines sixty years of training and practice to identify mistaken approaches and best practices Ultimately in the contemporary era of managed care Hadler argues for a clinical practice that draws on the best available scientific knowledge transmits the wisdom of experienced clinicians reforges an empathetic relationship between physician and patient and treats each patient as an individual all centered on restoring the mandate to care Masterclass in Medicine Marcy B.

Bolster, Jason Liebowitz, Philip Seo, 2024-10-29 Nearly every medical school around the world teaches a class about the clinical foundations of medicine and how to start the process of becoming a skilled and caring physician However there has never been a book on it until now This premier text brings together talented and renowned physicians from across the globe in order to discuss important topics related to clinical excellence including humility empathy and ingenuity in medicine Students physicians in training and health care professionals will gain tremendous knowledge by hearing the stories of what these master clinicians have learned from their patients and colleagues thereby providing a foundation in how to achieve greatness as a clinician **KEY FEATURES** Features engaging patient stories and personal reflections from a diverse set of authors Explores successes failures and lessons learned that cut across all fields of medicine Serves as a comprehensive meditation on master clinicianship that is ideal for courses in clinical foundations of medicine *Promoting Worker Health*

Nortin M. Hadler, M.D., Stephen P. Carter, 2018-06-13 In this extended essay Nortin M Hadler and Stephen P Carter introduce a new approach to reforming the American health care system a plan they call the Universal Workers Compensation Model UWCM Drawing on Hadler's expertise as a physician and Carter's as an attorney the two have conceived the UWCM as a state level alternative that would supersede current solutions debated at the national level They begin by summarizing the history and present complexity and irrationality of America's health insurance system They then lay out the key concepts underlying the UWCM regime and the practical policy steps necessary to enact it At the heart of the UWCM is a broader understanding of what constitutes worker's health one grounded in scientific research and cognizant of

the wide range of physical and mental illnesses that can afflict workers The UWCM stipulates a single policy providing rational and reasoned recourse for universal risks illness injury disability and death Presenting their ideas with precision in this 34 page pamphlet Hadler and Carter intend to spark discussion among health care providers insurers legislators and everyday citizens about how we might move beyond the limits of the current debate toward new truly effective solutions

Solving for Why Dr. Mark Shrime, 2022-01-25 From Mercy Ships surgeon Dr Mark G Shrime comes an inspiring memoir about finding the answer to life's biggest question Why and about following that answer through remarkable unlikely places on the road to fulfillment purpose and joy SOLVING FOR WHY chronicles one man's journey to find the answer to the biggest of all life's questions Why Following a traumatic car accident Dr Shrime the child of Lebanese immigrants fleeing a civil war who later became a successful practicing surgeon in Boston found himself compelled to change the course of his life determined to find meaning and satisfaction even if it meant diverting from America's idea of success Featuring stories insights and research from his own exceptional life and work SOLVING FOR WHY is the story of Dr Shrime's search for and discovery of lifelong fulfillment Now a global surgeon operating on a hospital ship docked off the coast of West Africa and one of the few global experts on surgery in low and middle income countries Dr Shrime seeks to impart the wisdom of the lessons he's learned over the course of his search for a life of true contentment In the tradition of Dr Paul Farmer's To Repair the World Dr Atul Gawande's Better and Dr Michele Harper's The Beauty in Breaking SOLVING FOR WHY combines personal stories with deep thoughtful research into the challenges of working in modern medicine in the 21st century and the commodification of work in America A story of discovery and transformation SOLVING FOR WHY seeks to help readers answer the why of their own lives and ultimately find joy outside the status quo **The Twenty-First Century and Its**

Discontents Jack Simmons, 2020-12-10 American culture is changing a sentiment echoed in phrases such as the new normal and in these uncertain times that regularly introduce all forms of public discourse now signally a national sense of vulnerability and transformation Cultural shifts generally involve multiple catalysts but in this collection the contributors focus on the role changing discourse norms play in cancel culture corporatism the counter sexual revolution racialism and a radically divided political climate Three central themes arise in the arguments First that contemporary discourse norms emphasize outcomes rather than shared understanding which support institutional and political goals but contribute to the contemporary political divide and the notion that we are engaged in a zero sum game These discourse norms give rise to a form of Adorno's administered world such that we order society according to dominant opinions which generally means those well acclimated to institutional and corporate culture Finally as Arendt feared the personal has become political meaning that the toxic public discourse invades private discourse reducing personal autonomy and leaving us perpetually under the scrutiny of institutional authority American Medical Schools and the Practice of Medicine William G.

Rothstein, 1987-10-29 In this extensively researched history of medical schools William Rothstein a leading historian of

American medicine traces the formation of the medical school from its origin as a source of medical lectures to its current status as a center of undergraduate and graduate medical education biomedical research and specialized patient care Using a variety of historical and sociological techniques Rothstein accurately describes methods of medical education from one generation of doctors to the next illustrating the changing career paths in medicine At the same time this study considers medical schools within the context of the state of medical practice institutions of medical care and general higher education The most complete and thorough general history of medical education in the United States ever written this work focuses both on the historical development of medical schools and their current status *Health Care Ethics* John F. Monagle, David C. Thomas, 2005 Provides expert help you need to make difficult bio ethical decisions covering a broad range of current and future health care issues as well as institutional and social issues applicable to multiple disciplines and settings

Haozous, Gerald Kayingo, William McDade, Lisa Meeks, Ana Núñez, Toyese Oyeyemi, Janet Southerland, Javeed Sukhera, 2024-09-18 Inequities in health care and medical education have a long and complex history involving racism sexism ableism exclusivity and other forms of social injustice *Reimagining Medical Education The Future of Health Equity and Social Justice* externally commissioned by the American Medical Association and part of the AMA MedEd Innovation Series explores and addresses these ongoing issues Using both theoretical and practical approaches medical educators share a vision of medical education through a social justice lens The resulting volume focuses on equity throughout medical education improving the diversity of the student faculty and health workforce and ameliorating inequitable outcomes among minoritized and marginalized patient populations This unique

change oriented text From the theoretical to the practical a diverse team of authors outline what an equitable future for medical education and health care can be A thought provoking account of the negative impact of centuries of asymmetry of power As part of the AMA MedEd Innovations series an aspirational vision of a just system for recruiting training and empowering the next generation of care providers and how to impact change at the individual institutional and population levels

Aging in Today's World Renée Rose Shield, Stanley M. Aronson, 2005 Never before in human existence have the aged been so numerous and for the most part healthy In this important new book two professionals an anthropologist and a physician wrestle with the complex subject of aging Is it inevitable Is it a burden or gift What is successful aging Why are some people better at aging than others Where is aging located How does it vary among individuals within and between groups cultures societies and indeed over the centuries Reflecting on these and other questions the authors comment on the impact age has in their lives and work Two unique viewpoints are presented While medicine approaches aging with special attention given to the body its organs and its functions over time anthropology focuses on how the aged live within their cultural settings As this volume makes clear the two disciplines have a great deal to teach each other and in a spirited exchange the authors show how professional barriers can be surmounted In a novel approach each author explores a different aspect of aging in alternating chapters These chapters are in turn followed by a commentary by the other Further the authors interrupt each other within the chapters to raise questions contradict ask for clarification and explore related ideas with these interjections emphasizing the dynamic nature of their ideas about age Finally a third voice that of a random old man periodically inserts itself into the text to remind the authors of their necessarily limited understanding of the subject
